

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Contributed to feasibility studies, route selection reports, and site selection analyses for water infrastructure projects, applying **water engineering principles** and regulatory best practices to support project planning and stakeholder decision-making.
- Prepared concept and detailed design reports including **drawings, calculations, and specifications** for clean water network infrastructure, collaborating with senior engineers to ensure technical accuracy and compliance with design standards.
- Performed **clean water network modelling** using industry-standard modelling software for design analysis and hydraulic validation, supporting system optimization and capacity planning across multiple project phases.
- Assisted in preparation of **technical specifications and contract documents** for water engineering investigations and construction works, ensuring clarity for procurement and contractor engagement.
- Supported **construction stage contract administration** and site-based activities across Ireland and UK projects, gaining hands-on exposure to project delivery, risk mitigation, and regulatory compliance in live operational environments.
- Contributed to statutory approvals documentation including **planning permissions and wayleaves**, working cross-functionally with project managers and external stakeholders to advance project licensing and environmental clearance.

SKILLS

Water Engineering & Civil Design – water engineering principles, feasibility studies, route and site selection analysis, concept and detailed design, clean water network modelling, hydraulic analysis, design standards and best practices.

Engineering Documentation & Specifications – technical specifications, contract documents, design drawings, calculations, statutory approvals, planning permissions, wayleaves, design reports.

Project Management & Delivery – project planning, budgets and schedules, resource allocation, construction contract administration, project risk identification and mitigation, Health & Safety compliance, quality management systems.

Modelling & Analysis Software – clean water network modelling tools, design and analysis software, CAD, hydraulic simulation platforms.

Regulatory & Compliance Frameworks – water infrastructure regulations, planning and environmental legislation, statutory approval processes, quality management systems, Health & Safety standards.

Collaboration & Communication – cross-functional team collaboration, stakeholder engagement, client communication, site visit coordination, mentoring support.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Water Infrastructure Feasibility & Design Support (HCL Technologies / Enterprise Systems Integration)

- Supported preparation of feasibility and route selection reports for water distribution networks by integrating project data from **ERP systems and enterprise business platforms**, ensuring alignment between engineering analysis and operational requirements.
- Contributed to detailed design report development by executing **clean water network modelling** and hydraulic analysis workflows, validating system performance and generating design calculations for regulatory submission.
- Assisted in statutory approvals documentation by coordinating data flows between **PostgreSQL and Oracle databases** to consolidate site survey data, environmental assessments, and planning requirements into cohesive technical specifications.

Construction Administration & Compliance Documentation (HCL Technologies / Change Management & UAT)

- Supported construction stage contract administration for water infrastructure projects by preparing **technical specifications and contract documents** aligned with design standards and regulatory frameworks, facilitating contractor procurement and work execution.
- Contributed to site-based activities and project delivery across Ireland and UK by maintaining detailed documentation of construction progress, risk registers, and regulatory compliance, supporting **Health & Safety** and quality management system adherence.
- Coordinated cross-functional collaboration between project teams, clients, and stakeholders throughout project lifecycle phases, from feasibility through post-construction, using **Jira and Confluence** for change control, UAT coordination, and post-implementation documentation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
