PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Responsible for timely and accurate client billing across enterprise financial systems, processing **150+ monthly invoices** for high-profile EMEA clients using **SQL** and **Excel** with **100% accuracy** against strict month-end close deadlines at **HCL Technologies**.
- Performed initial setup and ongoing maintenance of client static data within banking and financial services ERP systems, ensuring correct interpretation of documented fee arrangements and **reducing billing discrepancies by 40%** through data validation and schema governance.
- Executed timely completion of monthly accruals and revenue recognition across multiple legal entities, ensuring compliance with financial accounting standards and SOX audit requirements while meeting critical reporting deadlines for Financial Control teams.
- Collected fee debtors and generated payment instructions and banking entries in accordance with company and client-authorized procedures, maintaining **98% on-time collection rates** and strong vendor payment relationships.
- Liaised cross-functionally with Client Services, New Business Operations, and Finance teams to capture new client onboarding, fee-arrangement changes, and service terminations, translating business requirements into billing system configurations with **zero post-implementation errors**.
- Provided subject-matter expertise in fee-related internal and external audits, documentation of controls, and SOX compliance initiatives, escalating billing delays and issues with timely resolution and audit trail documentation.

SKILLS

Financial Operations & Billing – client billing, revenue recognition, accrual accounting, month-end close procedures, fee arrangement setup, payment instruction generation, banking entries, SOX compliance.

Data Analysis & Reporting – SQL (PostgreSQL, MySQL, Oracle), Excel (advanced), data validation, ad-hoc financial queries, reconciliation workflows, Power BI dashboards, operational reporting.

Enterprise Systems & Integration – ERP platforms, financial systems integration, REST APIs, cross-system data flows, change-control management, static data maintenance.

Banking & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, instant payments, cross-border payments, tokenization, PSD2 Open Banking, payments processing, transaction-flow visibility.

Collaboration & Communication – cross-functional partnership, stakeholder management, Client Services liaison, Business Operations coordination, written and verbal communication, issue escalation and resolution.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

International Banking Payments Operations & Fees Dashboard (HCL Technologies)

- Designed and maintained fee billing workflows for a Fortune 500 banking client across EMEA legal entities, ensuring accurate and timely invoice generation and revenue recognition for high-profile clients managing **USD 500M+ in annual fee transactions**.
- Implemented client static data governance controls using **SQL schema design** and **Excel validation frameworks**, interpreting complex fee arrangements (tiered fees, volume-based discounts, service-level adjustments) with **99.5% accuracy** against documented client contracts.
- Coordinated monthly accrual close processes across interconnected ERP and financial systems, reconciling fee accruals against billing records and ensuring compliance with GAAP revenue recognition standards and SOX control requirements, delivering financial statements **48 hours ahead of deadline**.
- Collaborated with Client Services and Business Operations teams on new client onboarding and fee-arrangement changes, translating business requirements into billing system configurations and supporting UAT validation with zero post-go-live billing errors.

Fee Reconciliation & Audit Automation Project (HCL Technologies)

- Developed **SQL-based reconciliation procedures** to validate fee data across multiple banking platforms and ERP modules, identifying and resolving discrepancies in accruals, invoices, and collections with **95% automated detection rate**.
- Built **Excel dashboards** and operational reports for Finance and Audit teams, providing real-time visibility into billing status, payment collection metrics, and compliance exceptions, enabling proactive escalation and reducing audit findings by **60%**.
- Authored comprehensive audit documentation and control runbooks, capturing SOX-compliant fee billing procedures and supporting internal and external audit engagements with full control evidence and change-management trails.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
