## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Designed and executed **functional and UAT testing** strategies for **payment processing software applications** in corporate banking domain, conducting **requirement analysis, UAT test case design and execution**, and **defect management** across SWIFT messaging and payments-operations dashboards, reducing production incidents by **40%** through comprehensive pre-release test coverage.
- Developed and maintained **re-usable regression test suites** for enterprise Java and .NET applications; executed **SQL scripts for database migration testing** across PostgreSQL, MySQL, and Oracle environments, validating **ISO 20022 message flows** and **SEPA payment processing workflows** with **99.2% test accuracy**.
- Conducted application and workflow process reviews to target **automation effectiveness**, identifying **20+ manual testing bottlenecks** and designing automated test frameworks using **Agile (Scrum)** and **Waterfall** SDLC methodologies, reducing regression cycle time by **35%**.
- Produced **high quality user test scripts** for multiple applications and workflow procedures aligned with business process requirements; maintained communication workstreams between developers, business analysts, and sponsor stakeholder teams across UAT phases and post-implementation support, achieving **98% first-pass test execution success rate**.
- Enhanced **QA test processes** to reduce production incidents by **45%** through implementation of automated controls and risk assessment frameworks; prioritized and developed enhancements to continuously improve **application stability and scalability** in post-production phases using **Splunk, CloudWatch, and Dynatrace** monitoring insights.
- Trained and educated junior team members on **QA processes, system architecture**, change-control procedures, and corporate banking domain fundamentals including SWIFT messaging (MT/MX), payments operations, regulatory compliance (GDPR), and cross-functional UAT coordination with business and operations teams.

## SKILLS

**QA & Testing** – functional testing, UAT testing, test case design and execution, defect management, regression testing, test automation, requirement analysis, test strategy development.

**Banking & Payments Domain** – corporate banking applications, payment processing software, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 awareness, Open Banking, payments operations, regulatory compliance (GDPR), post-implementation support.

**Database & SQL** – SQL scripting, database migration testing, PostgreSQL, MySQL, Oracle, data validation, schema changes, ad-hoc query development.

**SDLC & Methodologies** – Waterfall, Agile (Scrum), change-control management, risk automation controls, UAT coordination, post-production enhancement prioritization.

**Monitoring & Incident Management** – Splunk, CloudWatch, Dynatrace, production incident response, SLA management, application monitoring, stability and scalability assessment.

**Enterprise Systems & Integration** – ERP support, REST API integrations, cross-system data flows, enterprise business systems, system architecture fundamentals.

**Tools & Platforms** – Jira, Confluence, Git, Jenkins, Linux, shell scripting, AWS (EC2, S3, Lambda, CloudWatch), Docker, Power BI, Tableau.

## EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India

01/2021

## PROJECTS

### Corporate Banking Payment Testing Framework & Automation Platform (HCL Technologies)

- Architected and deployed a comprehensive **functional and UAT testing framework** for a tier-1 banking client's **payment processing software** covering **SWIFT MT/MX message flows**, **ISO 20022 payment instructions**, and **SEPA real-time settlement workflows**, with re-usable **regression test suites** and automated **SQL database migration validation scripts**.
- Designed **UAT test case libraries** and **user test scripts** aligned to business process requirements for multi-channel payment origination, clearing, and reconciliation; maintained communication workstreams between development, business analysts, and banking operations teams, achieving **98% test execution success rate** and reducing UAT cycle time from **6 weeks to 3.5 weeks**.
- Implemented **automated risk control validation** across **Agile (Scrum)** and **Waterfall** release phases using **Splunk and CloudWatch** monitoring integrations for real-time payment transaction traceability; **reduced production payment incidents by 45%** through enhanced pre-release defect detection and **requirement analysis** rigor.
- Developed junior QA team training curriculum on **QA processes**, **system architecture**, corporate banking domain concepts (SWIFT, ISO 20022, SEPA), regulatory compliance (GDPR), and **change-control management** procedures; onboarded **8 junior testers** to independently design and execute **functional and regression test cases**.
- Conducted quarterly application and workflow process reviews targeting **automation effectiveness**, identifying **23 manual testing opportunities** and designing **automated test frameworks** that reduced post-production incident volume by **40%** while improving **application stability** metrics by **3.2x**.

### SWIFT Payments Operations Dashboard – Production Support & Testing (HCL Technologies)

- Performed continuous **functional testing and UAT validation** of a mission-critical **SWIFT messaging dashboard** supporting **payment processing operations** for a global banking client; executed **defect management** and **test case execution** across **ISO 20022 message flows**, **SEPA payment instructions**, and cross-border payment reconciliation workflows.
- Maintained **re-usable regression test suites** and executed **SQL database migration testing** scripts validating payment transaction ledger consistency across PostgreSQL and Oracle environments; ensured **99.2% accuracy** in payment message validation testing and **zero post-implementation data loss**.
- Collaborated with banking operations and business analyst teams to translate regulatory requirements and **business process** changes into **UAT test case design**; documented **user test scripts** for operational staff across 4 banking centers and trained teams on updated **QA processes** and payment workflow testing procedures.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
