PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **publicly consumable REST APIs** using **Spring Boot** for enterprise banking and payments systems, implementing **Spring Security** authentication and token-based access control to secure external API endpoints; managed API lifecycle including versioning, deprecation, and client communication across multiple product releases.
- Deployed, monitored, and maintained production systems across **AWS** (EC2, S3, Lambda, CloudWatch) and **Azure** cloud platforms using **GitHub Actions** CI/CD pipelines; integrated observability through **Splunk**, **Dynatrace**, and **CloudWatch** for production monitoring, achieving **99.5% uptime SLA** through proactive alerting and incident response.
- Triageed and resolved production incidents for high-criticality REST APIs supporting financial services operations, conducting root cause analysis on **P1/P2 incidents** and implementing automated controls to prevent recurrence; reduced mean time to resolution (MTTR) by **35%** through enhanced observability practices and self-healing automation.
- Architected and implemented self-serve **token lifecycle management** features for external API clients, enabling automated token provisioning, rotation, and revocation through secure **REST API endpoints** with audit logging and compliance tracking.
- Partnered with Data Engineers, Software Engineers, and Automation Engineers within multidisciplinary value stream teams to deliver enhancements to existing BI products; participated in sprint ceremonies, design discussions, and technical code reviews, communicating requirements across banking domain stakeholders and operations teams.
- Leveraged **AI and prompt engineering** to automate build execution and testing workflows; demonstrated innovation in adopting new technologies including **Claude API** integration for intelligent API documentation generation and automated testing constraint validation.

SKILLS

Backend & API Development – Spring Boot, REST API design and development, Spring Security, API authentication and authorization, token lifecycle management, publicly consumable API endpoints.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, GitHub Actions, CI/CD pipelines, Docker, containerization, infrastructure as code principles.

Observability & Operations – Splunk, Dynatrace, CloudWatch, production monitoring, incident response, root cause analysis, alerting, SLA management, operational excellence.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), data modeling, ETL pipelines, Business Intelligence, Power BI, Tableau, DAX, Power Query, large-scale historical dataset management.

Languages & Tools – Java, Python, SQL, Linux, Git, Jenkins, Jira, Confluence, FastAPI, Flask, pandas, NumPy, scikit-learn.

Domain Expertise – Healthcare datasets, financial services, payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, ERP integration, regulatory compliance, GDPR, change-control management.

Emerging Technologies – AI/LLM integration, prompt engineering, GitHub Actions automation, Anthropic Claude API, automated testing and build optimization.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

SWIFT Payments Operations Dashboard & REST API (HCL Technologies)

- Designed and maintained **publicly consumable REST API endpoints** using **Spring Boot** for externally integrated payment operations clients; implemented **Spring Security** authorization controls with token-based authentication and API rate limiting.
- Integrated **observability practices** into production operations through **Splunk** and **Dynatrace** dashboards for real-time transaction flow monitoring, payment message visibility, and SLA compliance tracking across SWIFT MT/MX message processing pipelines.
- Triaged production incidents for mission-critical **REST API** endpoints supporting cross-border and instant payments, implementing automated alerting and achieving **99.5% uptime SLA**; conducted root cause analysis and implemented preventative controls, reducing incident recurrence by **40%**.
- Partnered with banking-domain Business Analysts, operations teams, and stakeholders on API requirements, UAT coordination, and post-go-live support; ensured **regulatory compliance** including GDPR, audit trail requirements, and **ISO 20022** message format standards across all API interactions.

Ireland Jobs Tracker – AI-Driven Resume & API Automation (Personal Project)

- Orchestrated end-to-end AI workflow automation integrating **Claude API** (Anthropic) with REST API-based job scraping infrastructure; engineered structured-JSON **prompt engineering** constraints and guardrails for intelligent, job-description-tailored content generation at scale.
- Deployed full CI/CD pipeline using **GitHub Actions** for automated testing, artifact generation, and deployment to **Vercel**; integrated **Apify** web scrapers for job description ingestion, Claude API for intelligent content generation, and **reportlab** for PDF rendering.
- Demonstrated innovation in leveraging **AI for build execution and automation**; implemented haiku-4-5 model optimization for cost-effective API orchestration while maintaining output quality and compliance with structured data requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
