PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **machine learning pipelines** for predictive analytics on enterprise payment systems, achieving **94% accuracy** in fraud detection models using **scikit-learn** and **XGBoost** across **PostgreSQL** and **Oracle** data warehouses.
- Built end-to-end **AI-powered automation workflows** leveraging **Claude API** and **prompt engineering** to generate personalized business intelligence artifacts, reducing manual report generation time by **80%** and scaling to **500+ daily outputs**.
- Led statistical modeling and hypothesis testing initiatives using **R/RStudio** and **Python (pandas, NumPy)** on financial transaction datasets, delivering **15+ actionable insights** that informed regulatory compliance and risk-mitigation strategies for banking operations.
- Orchestrated **data engineering pipelines** using **Python**, **SQL ETL**, and **AWS Lambda** to ingest, validate, and transform multi-source financial messaging data (**SWIFT MT/MX**, **ISO 20022**) into **Power BI** and **Tableau** dashboards, enabling real-time SLA monitoring for **99.8% uptime**.
- Implemented advanced **data visualization dashboards** in **Power BI** with **DAX measures** and **Power Query** transformations for C-suite stakeholders, tracking **KPIs** across payments processing, reconciliation workflows, and regulatory audit trails in GDPR-compliant environments.
- Mentored cross-functional teams on **machine learning model evaluation**, **A/B testing methodologies**, and **time-series forecasting** techniques, driving adoption of data-driven decision-making across **15+ business units** in financial services.

SKILLS

Machine Learning & AI – scikit-learn, XGBoost, supervised learning, unsupervised learning, neural networks, model evaluation, prompt engineering, Claude API, LLM orchestration.

Data Science & Statistics – statistical analysis, hypothesis testing, A/B testing, time-series forecasting, regression analysis, exploratory data analysis, experimental design.

Data Engineering & Pipelines – Python, SQL, ETL, data warehousing, AWS Lambda, Apache Spark, big-data processing, data validation, schema design.

Business Intelligence & Visualization – Power BI, Tableau, DAX, Power Query, data modeling, dashboard development, KPI tracking, stakeholder reporting.

Programming & Development – Python, Java, Spring Boot, REST APIs, Flask, FastAPI, Git, CI/CD, Docker, Linux, shell scripting.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), containerization, monitoring, application support.

Domain Expertise – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments processing, financial services operations, regulatory compliance, GDPR, ERP integration, payments reconciliation.

EDUCATION AND TRAINING

PROJECTS

AI-Driven Resume Generation & Job-Market Intelligence Platform (Ireland Jobs Tracker)

- Architected and deployed an **end-to-end AI automation system** integrating **Apify web scrapers**, **Claude API (Anthropic)**, and **prompt engineering** to generate personalized, job-description-tailored resumes at scale.
- Implemented **structured JSON prompt engineering** with constraint-based guardrails to ensure **100% compliance** with JD requirements, reducing resume-customization overhead by **85%** and enabling **1,000+ concurrent JD analyses**.
- Orchestrated full **AI workflow pipeline**: JD ingestion → **Claude LLM processing** → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel deployment**, delivering a production-grade SaaS tool with **99.2% uptime**.

SWIFT Payments Operations Dashboard & Real-Time Compliance Monitoring (HCL Technologies)

- Designed and operationalized a **real-time monitoring dashboard** for **SWIFT messaging** and **ISO 20022 transaction flows** in a Tier-1 banking environment, tracking **payment SLAs**, **regulatory audit trails**, and **GDPR compliance** across **50,000+ daily transactions**.
- Built **Python ETL pipelines** and **SQL data transformations** (PostgreSQL, Oracle) to normalize **SWIFT MT/MX formats**, **SEPA message structures**, and cross-border payment metadata into **Power BI dashboards**, achieving **98.5% data accuracy** and **real-time visibility**.
- Established **production incident response workflows** using **Splunk** and **Dynatrace** for P1/P2 alerting on payment-processing failures, reducing MTTR by **40%** and maintaining **99.8% uptime** for mission-critical payments operations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
