PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built, maintained and secured **publicly consumable REST APIs** using **Spring Boot** in production environments, implementing **Spring Security** controls and token lifecycle management features for external client consumption across financial services and enterprise business systems.
- Triaged and contributed to **operational evaluations on production systems** using **Splunk, CloudWatch, and Dynatrace** observability tools; managed **P1/P2 incident response**, root cause analysis, and post-incident reviews with **SLA** enforcement in banking and payments operations domains.
- Deployed, monitored and maintained systems in production using **CI/CD pipelines** with **GitHub Actions, Jenkins**, and Git branching workflows; integrated automated controls and observability into operational processes across **AWS** infrastructure (**EC2, S3, Lambda, CloudWatch**) and **Docker** containerized environments.
- Partnered with Data Engineers, Software Engineers, and cross-functional teams within multidisciplinary value streams to deliver enhancements to existing Business Intelligence and payments-operations products; participated in sprint ceremonies, design discussions, technical reviews, and UAT coordination with stakeholder communication across banking operations and enterprise systems.
- Developed and executed **observability implementations** in production API operations, establishing monitoring strategies, alerting frameworks, and dashboards using **Splunk** and **CloudWatch** to ensure reliability and transparency of publicly consumable endpoints serving external clients.
- Leveraged **AI and prompt engineering** to automate build execution and content generation workflows; integrated **Claude API** with **GitHub Actions** CI/CD pipelines to enable innovative, scalable automation patterns for production-grade systems.

SKILLS

REST API Development & Security – Spring Boot, Spring Security, public API design, token lifecycle management, REST endpoint security, API authentication and authorization.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD pipelines, GitHub Actions, Jenkins, containerization, cloud deployment and monitoring.

Production Operations & Observability – incident response, P1/P2 triage, root cause analysis, SLA management, Splunk, Dynatrace, CloudWatch, operational excellence, reliability engineering.

Backend & Data Engineering – Java, Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), ETL, data pipelines, REST API integrations, schema design and optimization.

Team Collaboration & Agile – Scrum ceremonies, sprint planning, technical design reviews, cross-functional partnerships, stakeholder communication, Jira, Confluence, UAT coordination.

AI & Automation Engineering – Claude API, Anthropic SDK, prompt engineering, LLM orchestration, workflow automation, GitHub Actions integration, innovative technology adoption.

Business Systems & Change Management – ERP integration support, enterprise business system administration, change-control management, cross-system data flows, operational support.

EDUCATION AND TRAINING

PROJECTS

RESTful Payments Operations Dashboard & API Layer (HCL Technologies)

- Designed and maintained **publicly consumable REST APIs** for a SWIFT messaging and payments-operations dashboard serving banking clients; implemented **Spring Security** authentication and token lifecycle management features enabling secure external client access to payment transaction flows.
- Established **observability and monitoring** across API endpoints using **CloudWatch** and **Splunk**; configured automated alerting, SLA thresholds, and incident dashboards to detect anomalies in payment message processing and ensure **P1/P2 incident response** within defined SLAs.
- Deployed API infrastructure using **CI/CD pipelines** with **Jenkins** and **GitHub** branching; coordinated **GitHub Actions**-driven deployment workflows across AWS environments and managed change-control processes with UAT teams and banking operations stakeholders for regulatory compliance.

Enterprise ERP Integration & Operational Support Automation (HCL Technologies)

- Supported and enhanced cross-system integrations between banking and enterprise business systems using **REST APIs** and database-level data flows across **PostgreSQL, Oracle, and MySQL** environments; implemented change-control management for configuration updates and post-go-live operational support.
- Automated production monitoring and operational alerting using **Python scripting, Linux shell** automation, and **SQL** queries; reduced manual triage overhead by **40%** through scheduled reporting pipelines and log-analysis workflows integrated with **Splunk** and **Dynatrace**.
- Partnered with data engineering and automation teams to deliver operational enhancements; coordinated UAT, stakeholder communication, and post-implementation triage across interconnected systems serving enterprise business operations and banking domain requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
