PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **high-traffic backend services** in **Java Spring Boot** and **Python**, delivering REST APIs and core platform features with **99.5% uptime SLA** across production environments; implemented **API design reviews** and consistency standards to ensure developer-friendly integrations used by thousands of downstream consumers.
- Designed and owned **event-driven notification infrastructure** handling **10M+ daily webhook and email events** using **AWS SQS, EventBridge, and Lambda**; architected retry logic, dead-letter queues, and delivery guarantees to achieve **99.9% notification reliability** for merchant-critical billing and payment events.
- Contributed to **authentication and app marketplace systems** supporting **6000+ seller integrations**; implemented **OAuth2 flows, token management, and permission scoping** while maintaining backward compatibility and security standards, reducing authentication-related support tickets by **35%**.
- Developed and maintained **Go, Python, and PHP (Laravel) SDKs** reducing time-to-integration for developers by **40%**; wrote comprehensive developer-facing documentation, code samples, and internal onboarding materials to scale API adoption across cross-functional product and engineering teams.
- Led **production incident response and reliability engineering** using **AWS CloudWatch, monitoring, and alerting** to maintain **SLA compliance** on payment-critical services; performed root-cause analysis, deployed fixes via **Git-based CI/CD pipelines and Jenkins automation**, and documented lessons learned to prevent **P1/P2 recurrence by 28%**.
- Mentored peers on **API design principles, distributed systems failure modes, and SDK best practices**; contributed to code reviews with constructive feedback emphasizing developer experience, scalability, and operational reliability; actively explored **AI-driven tooling to improve developer productivity** and accelerate integration workflows.

SKILLS

Backend Languages & Frameworks – Go, Java Spring Boot, Python, PHP (Laravel), FastAPI, Flask.

API Design & Developer Tooling – REST API architecture, SDK development and maintenance (Go, Python, PHP), API consistency standards, developer experience optimization.

AWS Infrastructure & Event-Driven Systems – EC2, S3, Lambda, CloudWatch, SQS, EventBridge, ECS, high-throughput event processing, distributed systems.

Production Systems & Reliability – Production monitoring and incident management, SLA management, P1/P2 incident response, root-cause analysis, CloudWatch observability, authentication systems, webhook infrastructure.

Data & Backend Tooling – SQL (PostgreSQL, MySQL, Oracle), data pipelines, ETL automation, Python scripting, Linux, Docker, Git, Jenkins CI/CD.

Payments & Financial Services Domain – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA and cross-border payments, PSD2 and Open Banking, payments-operations platforms, regulatory compliance (GDPR), financial transaction processing.

Cross-Functional Collaboration & Documentation – Code reviews, developer documentation, internal technical writing, product-mindset engineering, AI tooling exploration, UAT coordination.

EDUCATION AND TRAINING

PROJECTS

Event-Sourced Notification Mesh for Payments Platform (HCL Technologies)

- Architected and deployed a **distributed webhook and email notification system** using **AWS EventBridge, SQS, Lambda, and Python** to reliably deliver **10M+ merchant notifications daily** (billing events, payment confirmations, subscription updates) with **99.9% delivery guarantee** and **<100ms end-to-end latency**.
- Designed **retry logic, dead-letter queue handling, and exponential backoff strategies** to handle transient failures and merchant endpoint unavailability; implemented **idempotency tokens and deduplication** to prevent duplicate webhook deliveries, reducing merchant reconciliation overhead by **45%**.
- Built comprehensive **observability and alerting** using **CloudWatch dashboards, custom metrics, and SNS alerts**; established **SLA dashboards and incident runbooks** enabling on-call teams to detect and respond to delivery degradation within **5 minutes** of onset.
- Developed **Python SDK abstractions and Go service endpoints** abstracting webhook complexity from merchant applications; published **developer-facing documentation, code samples, and integration patterns** reducing merchant time-to-first-webhook from **2 weeks to 2 days**.
- Collaborated with product and support teams to gather requirements for new notification event types and merchant filtering preferences; iterated on API design based on developer feedback to ensure **high adoption and positive satisfaction scores (92% CSAT)** among integrated merchants.

Multi-Tenant Authentication & App Marketplace Gateway (HCL Technologies)

- Engineered a **centralized authentication and authorization service** in **Go and Spring Boot** supporting **6000+ seller integrations** across Paddle's platform; implemented **OAuth2 flows, JWT token generation, scoped permissions, and API key management** with **sub-millisecond latency**.
- Designed **app marketplace infrastructure** enabling third-party developers to build integrations; managed **API access scoping, permission delegation, and audit logging** in compliance with **security and regulatory standards**; reduced authentication-related support requests by **35%** through intuitive developer tooling.
- Wrote extensive **developer documentation, authentication guides, and best-practice runbooks**; maintained **open-source authentication SDKs** in **Go, Python, and PHP**, enabling developers to integrate with **single-click setup** and reducing onboarding friction by **40%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
