PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **data attributes across multiple data sources** using **Python, SQL, and Java Spring Boot** REST APIs to integrate enterprise banking systems; engineered **ETL pipelines** processing 500K+ daily payment records with **95%+ data quality assurance** across PostgreSQL, MySQL, and Oracle relational databases.
- Supported **analytics and data quality initiatives** by building **Power BI dashboards** and **Tableau interactive reports** for business stakeholders; performed **data manipulation and reporting** on production transaction datasets, reducing manual reconciliation effort by **40%** through automated validation workflows.
- Collaborated with internal teams and cross-functional banking domain business analysts to deliver **business-focused solutions** for SWIFT messaging operations dashboards; designed schema changes and data models in **relational databases** to support new analytics requirements and regulatory compliance reporting.
- Applied **strong analytical and problem-solving skills** using **Python pandas, NumPy, and scikit-learn** to analyze payment flows, identify data anomalies, and implement statistical validation rules; conducted hypothesis testing and exploratory data analysis on 12+ months of transactional data to surface operational insights.
- Maintained production **data attributes and data pipelines** via **Git, Jenkins CI/CD**, and automated scheduling with **Linux cron jobs** and **Python scripting**; ensured SLA compliance and audit trail integrity for banking client systems handling ISO 20022 / SEPA payment messages.
- Engineered **data manipulation and reporting** layers supporting business intelligence across ERP and enterprise business systems using **Power Query ETL, DAX measures, and data warehousing principles**; delivered 8+ published reports to executive stakeholders with **99.2% uptime** across hybrid cloud and on-premises infrastructure.

SKILLS

Programming & Data Engineering – Python, Java, SQL, pandas, NumPy, scikit-learn.

Data Science & Analytics – Machine learning (supervised/unsupervised), statistical analysis, hypothesis testing, exploratory data analysis, A/B testing, time-series analysis.

Relational Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, data modelling, ETL, schema design, data quality assurance.

Business Intelligence & Visualization – Power BI, Tableau, DAX, Power Query, interactive dashboards, data attribute management.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins, Linux, Splunk, Dynatrace.

Domain & Compliance – Banking/payments operations, SWIFT messaging (MT/MX), ISO 20022, SEPA, PSD2, GDPR, change management, UAT coordination.

Tools & Frameworks – Spring Boot, REST APIs, Flask, FastAPI, Jira, Confluence, R/RStudio.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Multi-Source Payment Data Attribute Platform (HCL Technologies)

- Architected and deployed a unified **data attributes management system** consolidating payment transaction metadata from 6+ enterprise banking data sources (SWIFT, ERP, settlement systems) using **Python ETL pipelines** and **PostgreSQL/Oracle relational databases**; ingested **2.3M daily transactions** with **99.8% accuracy** through automated validation rules.
- Developed **Power BI dashboards** and **Tableau analytical reports** for data quality monitoring, compliance auditing, and operational analytics; exposed **50+ business-critical data attributes** through RESTful **Spring Boot APIs** enabling real-time access across internal teams and banking client stakeholders.
- Implemented **data manipulation and reporting** workflows using **Python (pandas, NumPy), SQL, and Power Query** to cleanse, transform, and publish ISO 20022 / SEPA payment attributes; reduced data reconciliation time by **55%** and eliminated **12 manual daily reconciliation processes**.
- Engineered **CI/CD pipelines with Jenkins, Git, and Linux scheduling** to automate attribute refresh cycles; maintained **SLA compliance of 99.5%+** with full audit trails for regulatory reporting (GDPR, change-control governance) across hybrid cloud and on-premises infrastructure.
- Collaborated with business analysts, operations teams, and compliance officers to translate analytics requirements into **data schema changes and relational database** updates; delivered 18-month project supporting 250+ concurrent users across banking and internal business units.

SWIFT Payments Operations Dashboard & Data Quality Framework (HCL Technologies)

- Designed and maintained core **data attributes** across SWIFT messaging platform supporting **500K+ daily payment messages**; applied **strong analytical and problem-solving skills** to implement data validation rules, anomaly detection, and quality metrics using **Python, SQL, and relational databases**.
- Built **analytics dashboards** in **Power BI and Tableau** for production monitoring, transaction flow visibility, and operational alerting; exposed key data attributes (SWIFT MT/MX message routes, SEPA corridors, cross-border flows) enabling operations teams to reduce P1 incident response time by **35%**.
- Collaborated with banking domain business analysts and regulatory teams to support **business-focused solutions** for PSD2 / GDPR compliance reporting; designed **data modelling and ETL** changes to capture and audit all payment attribute transformations with full traceability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
