PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed, and maintained scalable web applications using **.NET / C#** and **React**, delivering high-quality user interfaces with strong focus on usability and responsive design across enterprise banking and payments platforms.
- Built and integrated **REST APIs** using **Spring Boot** and **.NET** microservices, enabling seamless cross-functional system integrations and supporting **architecture decisions** across interconnected ERP and operational business systems.
- Wrote clean, maintainable, and well-tested code using **Git version control**, participated in rigorous **code reviews**, and contributed to **Agile ceremonies** (standups, refinements, retrospectives) in fast-paced, collaborative engineering teams.
- Architected and deployed cloud-native applications on **Microsoft Azure** (compute, storage, networking) and **AWS** (EC2, S3, Lambda, CloudWatch), implementing **CI/CD pipelines** via **Jenkins** and **GitHub Actions** for automated builds, testing, and production releases.
- Applied **UI/UX design principles** including accessibility standards, usability heuristics, and user-centered design methodologies to build intuitive dashboards and transaction-flow interfaces supporting 24/7 production operations for mission-critical payments systems.
- Executed change-control management, UAT coordination, and post-go-live support for system configuration updates across interconnected platforms; collaborated with cross-functional teams including product managers, designers, business analysts, and operations stakeholders to translate requirements into shipped features.

SKILLS

Backend & Full-Stack Development – .NET, C#, Java, Spring Boot, REST APIs, microservices architecture, application design.

Frontend Development – React, responsive web design, UI/UX design principles, component-driven development, modern web frameworks.

Cloud & DevOps – Microsoft Azure (compute, storage, deployments, cloud-native development), AWS (EC2, S3, Lambda, CloudWatch), CI/CD pipelines, Jenkins, GitHub Actions, Docker, containerisation.

Data & Databases – SQL (PostgreSQL, MySQL, Oracle), schema design, ad-hoc queries, data validation, relational database management.

Version Control & Agile – Git, branching strategies, code reviews, Jira, Confluence, Agile methodologies, Scrum ceremonies, change-control management.

Problem-Solving & Attention to Detail – debugging complex systems, log analysis, incident response, production reliability, quality assurance, cross-system troubleshooting.

Collaboration & Communication – cross-functional teamwork with product managers, designers, business analysts, operations teams, UAT support, requirements gathering.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Designed and developed a mission-critical **React**-based frontend interface for a **SWIFT messaging / payments-operations dashboard** serving a tier-1 banking client, enabling real-time transaction-flow visibility, operational alerting, and payment message monitoring across cross-border and SEPA payment corridors.
- Implemented **REST API integrations** with **.NET / C#** backend microservices to ingest **ISO 20022 message flows**, payment reconciliation data, and compliance audit trails; applied **UI/UX design principles** to surface critical payment data and SLA metrics to operations teams with **responsive, user-friendly interfaces**.
- Collaborated with cross-functional teams including banking-domain business analysts, compliance officers, and operations stakeholders to translate regulatory requirements (GDPR, PSD2, financial audit standards) into application features; executed **change-control management** and UAT coordination for post-implementation support and production reliability.

Ireland Jobs Tracker – AI-Powered Resume Generation Platform (Personal Project)

- Architected and deployed a full-stack **.NET / React** web application integrating the **Claude API (Anthropic)** to generate job-description-tailored resumes at scale, orchestrating end-to-end **AI workflow automation** from job scraping through structured-JSON prompt engineering to PDF generation.
- Built **REST API endpoints** in **.NET / C#** to manage job ingestion, LLM orchestration, and resume storage; developed **React** frontend components for job browsing, customisation, and download workflows; deployed via **GitHub Actions CI/CD** and **Azure** for automated testing and production releases.
- Implemented constraint guardrails, prompt-optimization techniques, and error-handling patterns within the Claude API integration; published live application on cloud infrastructure demonstrating proficiency in **modern web development practices, microservices architecture**, and full-stack software delivery.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
