PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed support, availability, and performance of critical core business applications in **enterprise ERP and membership platforms**, maintaining **99.2% system uptime** and exceeding service level agreements across production environments.
- Acted as first point of contact for IT helpdesk ticket resolution, independently diagnosing and resolving **150+ monthly tickets** with **92% first-contact resolution rate** through structured problem-solving and root-cause analysis.
- Configured, maintained, and supported **ERP systems and enterprise business platforms**, ensuring data integrity, system stability, and alignment with business requirements through change control processes and configuration management.
- Assessed, documented, and implemented **system configuration changes** in line with agreed change control procedures, preparing **40+ changes annually** for approval, coordinating UAT, and maintaining comprehensive audit records for regulatory compliance.
- Developed and maintained comprehensive **system documentation including process maps, user guides, and training materials**, enabling consistent adoption across the organisation and reducing support ticket volume by **18%** through improved self-service knowledge.
- Produced ad hoc reports and developed **Power BI dashboards** supporting business and leadership reporting requirements, including **operational performance metrics, data quality dashboards, and executive KPI reporting** aligned with organisational goals.

SKILLS

Application Support & Systems Management – helpdesk ticket management, incident triage and resolution, system availability monitoring, SLA management, service reliability engineering.

ERP & Business Systems – ERP platform configuration and support, membership system administration, cross-system integrations, data integrity management, change control and deployment coordination.

Business Analysis & Requirements Gathering – stakeholder engagement, business requirement analysis, system improvement identification, user acceptance testing (UAT) coordination, operational process mapping.

Data Analysis & Business Intelligence – Power BI dashboard development, data modelling, ad hoc reporting, operational metrics, executive KPI reporting, Power Query ETL.

User Training & Onboarding – targeted training delivery, system user onboarding, user adoption support, documentation-led knowledge transfer, process training materials.

Regulatory Compliance & Data Governance – GDPR compliance, Data Protection Acts adherence, data standards maintenance, audit trail management, regulatory documentation.

Technical Skills – SQL (PostgreSQL, MySQL, Oracle), Python scripting, REST APIs and system integrations, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD, Jira, Confluence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payments Operations & ERP Integration Platform (HCL Technologies, Banking & Financial Services)

- Provided critical application support and availability management for a **SWIFT messaging and payments-operations dashboard** serving a tier-1 banking client, ensuring **99.5% uptime** and **SLA compliance across all production payment flows**.
- Configured and maintained **ERP integrations and enterprise business system configurations** across interconnected **PostgreSQL, MySQL, and Oracle databases**, supporting cross-system data flows and reconciliation workflows for payments processing and settlement.
- Assessed and implemented **system configuration changes** in compliance with banking change-control procedures, coordinating **UAT cycles, post-go-live support, and production triage** across interconnected enterprise platforms serving **SEPA, instant payments, and cross-border payment flows**.
- Gathered and analysed business requirements across banking operations and finance teams, contributing to system improvement identification and supporting the delivery of **ISO 20022 message structure compliance and tokenization feature enhancements**.
- Developed **operational alerting dashboards and transaction-flow visibility reports** using **Splunk and CloudWatch**, enabling real-time monitoring of payment message processing and regulatory compliance tracking across **SWIFT MT/MX message formats**.
- Maintained comprehensive **system documentation, process maps, and training materials** for banking operations teams, ensuring adherence to **GDPR, Data Protection Acts, and financial services regulatory requirements** across all system configurations and data handling procedures.

Ireland Jobs Tracker – AI-Powered Resume Generation & Workflow Automation

- Engineered and deployed an end-to-end **system integration and automation workflow** combining **Apify web scrapers, Claude API integration, reportlab PDF generation, GitHub Actions CI/CD pipelines, and Vercel deployment**, demonstrating full-stack system orchestration and change management.
- Designed and implemented **structured data ingestion and transformation pipelines**, processing job description data through **Claude Haiku API with constraint-based prompt engineering**, generating **tailored resume content at scale** with **JSON schema validation and quality guardrails**.
- Configured **CI/CD automation using GitHub Actions** for continuous integration and deployment workflows, implementing **automated testing, artifact generation, and production deployment** to Vercel, demonstrating hands-on **change control and reliable system delivery** practices.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
