PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and built **Python web application backends** using **Django** and **REST APIs** for enterprise Java/.NET microservices integration, enabling **12+ cross-functional teams** to collaborate on feature delivery with **99.2% uptime SLA** across production environments.
- Developed **clean, maintainable, and well-tested code** in **Python** with **type hinting and async programming patterns**, reducing application latency by **35%** and improving code review cycle time by **40%** through adherence to engineering best practices.
- Implemented backend features and troubleshoot bugs across **PostgreSQL and MySQL** relational databases, optimizing query performance on **500M+ transaction records** and supporting UAT teams with **schema changes and data validation** across production payment systems.
- Collaborated with senior engineers and technical leads on **Docker containerization** and **CI/CD pipeline improvements** using **Jenkins and Git workflows**, reducing deployment time by **50%** and enabling **8+ daily releases** for core platform features.
- Participated in code reviews and team engineering discussions to implement **product architecture improvements**, including REST API design refinements and **application reliability enhancements** that reduced incident response time by **30%** for payment-operations dashboards.
- Supported implementation of **document management and workflow systems** through cross-functional collaboration with senior developers and business stakeholders, delivering **6 major feature releases** and improving application performance by **25%** through profiling and optimization.

SKILLS

Backend & Web Frameworks – Python, Django, REST APIs, FastAPI, Flask.

Frontend & JavaScript – React, Angular, component-driven development.

Databases & SQL – PostgreSQL, MySQL, Oracle, relational data modeling, query optimization, schema design.

DevOps & Infrastructure – Docker, containerization, CI/CD pipelines, Jenkins, Git, collaborative development workflows.

Python Ecosystem – type hinting, async programming, data classes, pandas, NumPy, scikit-learn.

Enterprise & Cloud – AWS (EC2, S3, Lambda, CloudWatch), application performance monitoring, incident management, change-control workflows.

Additional Skills – XML processing and transformation, document management systems, Linux, shell scripting, Power BI dashboards, Jira, Confluence.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Intelligent Document Workflow Engine & REST API Platform (HCL Technologies)

- Architected and deployed a **Python Django-based document management backend** with **RESTful APIs** and **PostgreSQL** data persistence, enabling legal and regulatory content workflow automation across **80+ enterprise clients** with **99.5% uptime**.
- Implemented **async Python processing pipelines** for XML document transformation and validation, reducing workflow processing time from **8 minutes to 45 seconds** and supporting **10,000+ daily transactions** across regulatory compliance systems.
- Built **Docker containerized microservices** integrated with **CI/CD Jenkins pipelines** and **Git branching strategies**, enabling **12 autonomous team squads** to ship features independently with **zero deployment conflicts**.
- Designed database schemas in **PostgreSQL** with optimized indexing and query patterns, improving document retrieval latency by **60%** and reducing database CPU usage by **40%** under peak load of **500 concurrent users**.
- Collaborated with senior engineers on **REST API design** and **code review practices**, delivering **type-safe Python endpoints** with comprehensive test coverage that reduced production bugs by **55%** in the first quarter.

SWIFT Payments Operations Monitoring & Alerting Dashboard (HCL Technologies)

- Supported backend services for a **SWIFT messaging and payments-operations dashboard**, implementing **Python automation scripts** for ISO 20022 message parsing and **PostgreSQL schema maintenance** supporting cross-border payment processing with **regulatory audit compliance**.
- Optimized **REST API** endpoints for payment transaction visibility, reducing dashboard load time by **45%** and enabling real-time monitoring of **50,000+ daily SEPA instant payments** with **SLA-driven alerting**.
- Troubleshoot production incidents and improved application reliability by analyzing logs and implementing **Docker-based containerization** for payment-processing microservices, achieving **99.9% availability** for mission-critical banking workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
