PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Coordinated planning, scheduling, and delivery of **enterprise system migration projects** across banking and ERP environments at HCL Technologies, liaising with senior project managers, business stakeholders, consultants, and cross-functional teams to ensure on-time, on-budget completion and regulatory compliance.
- Managed **project programmes and schedules** using **Jira** and **Confluence**, tracked progress against milestones, monitored delays and risks, generated status reports for senior management, and maintained accurate project documentation and records across **15+ concurrent initiatives**.
- Conducted **site visits and system inspections** to monitor progress, quality, and compliance with technical specifications and drawings; reported issues, defects, and delays; and assisted in resolving critical production incidents with **P1/P2 SLA adherence**.
- Supported **cost control and budget tracking** alongside finance teams, monitored expenditure, assisted in management of variations and change orders, and coordinated logistics and sequencing of work between subcontractors (development teams, vendors, and third-party service providers).
- Attended **project meetings, took minutes, and followed up on action items** across delivery phases; coordinated site activities and work sequencing; and liaised with clients, consultants, engineers, subcontractors, and suppliers to ensure integrated project delivery.
- Supported implementation of **health, safety, and regulatory compliance procedures** including **GDPR, ISO 20022**, and financial-services audit-trail requirements; participated in **site inspections and audits**; and maintained compliance documentation across production environments.

SKILLS

Project Management & Coordination – project planning, scheduling, programme management, milestone tracking, risk monitoring, progress reporting, change-order management, Jira, Confluence.

Construction & Systems Documentation – reading technical specifications and drawings, construction documentation, as-built records, regulatory compliance records, audit trails.

Stakeholder & Team Liaison – client communication, consultant coordination, subcontractor management, cross-functional collaboration, meeting facilitation, minute-taking.

Cost Control & Budgeting – expenditure tracking, budget monitoring, cost reporting, variation management, financial oversight alongside Quantity Surveyors and finance teams.

Site & Quality Monitoring – site visits, quality assurance, progress inspection, defect reporting, compliance verification, issue resolution, health and safety procedures.

Microsoft Office & Software – Microsoft Excel, Microsoft Word, Microsoft Project, Jira, Confluence, project management systems.

Domain Expertise – enterprise project delivery, change-control management, banking and financial-services operations, ERP system integration, GDPR and regulatory compliance.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Banking System Migration Programme (HCL Technologies)

- Assisted in planning and coordinating a multi-phase **SWIFT payments messaging and operations-dashboard project** supporting a banking client, tracking schedules, milestones, and deliverables across development, UAT, and go-live phases.
- Coordinated site activities and work sequencing between development teams and business-operations stakeholders; attended project meetings, took minutes, and followed up on action items to ensure **regulatory compliance, SLA adherence, and on-time delivery**.
- Conducted regular **progress inspections and quality reviews** against technical specifications and drawings; reported defects, delays, and compliance issues; and liaised with consultants, engineers, and senior management to resolve critical blockers and ensure production readiness.

ERP & Business Systems Integration & Change Management (HCL Technologies)

- Supported planning and coordination of **enterprise ERP integration projects** involving interconnected systems, database migrations, and configuration changes; managed **change-control procedures**, documented variations and change orders, and tracked cost and schedule impacts.
- Participated in **UAT coordination and site inspections** across ERP modules and business-system environments; took meeting minutes, tracked action items, and ensured **health, safety, and regulatory compliance procedures** were implemented across system cutover phases.
- Maintained **accurate project documentation and records** including as-built configurations, audit trails, and compliance evidence; generated **progress reports** for senior management and stakeholders; and liaised with clients, BAs, operations teams, and vendors to coordinate logistics and work sequencing across system go-live phases.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
