PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **CI/CD pipelines** using **Jenkins** and **Git** across product teams, reducing release cycle time by **40%** and enabling automated testing and deployment workflows for Java Spring Boot microservices in production environments.
- Built **Python automation scripts** and **Bash shell scripts** for routine operational tasks including log aggregation, infrastructure health checks, and scheduled reporting, eliminating **15 hours/week** of manual operational overhead across cloud and on-premises environments.
- Managed **AWS cloud infrastructure** (EC2, S3, Lambda, CloudWatch) and **Docker containerization**, implementing **Infrastructure-as-Code** principles for repeatable, auditable deployments with version control; collaborated on migration of legacy applications to containerized architectures with **30% cost reduction**.
- Operated production observability and incident management workflows using **Splunk**, **Dynatrace**, and **CloudWatch**, implementing **metrics, logging, alerting, and tracing** for SLA compliance; participated in **on-call rotation** and post-incident reviews, resolving **P1/P2 production incidents** with **99.5% uptime SLA maintenance**.
- Contributed to cross-functional delivery across product engineering, QA, security, and support teams in a banking domain environment; authored comprehensive **runbooks, procedures, and documentation** in **Confluence** for operational clarity and knowledge transfer, improving team onboarding time by **50%**.
- Engineered **Claude API** automation orchestration with **prompt engineering** and **structured-JSON constraints**, integrating data pipelines (Apify scrapers), **Python data processing**, and **CI/CD automation** (GitHub Actions), deployed to **Vercel**; demonstrates end-to-end DevOps automation and cloud deployment patterns.

SKILLS

DevOps & CI/CD – Jenkins pipelines, Git branching, Azure DevOps, CI/CD concepts and automation, release process orchestration, GitOps workflows.

Cloud & Infrastructure – Microsoft Azure (AKS Kubernetes clusters, Azure Monitor), AWS (EC2, S3, Lambda, CloudWatch), Infrastructure-as-Code, Terraform, Helm charts, resource cost monitoring.

Programming & Scripting – Python, Bash, PowerShell, shell scripting, cron jobs, Linux systems administration, networking fundamentals (TCP/IP, DNS, firewalls).

Containers & Orchestration – Docker containerization, Kubernetes (AKS), container networking, deployment orchestration, declarative deployments.

Observability & Monitoring – Prometheus, Grafana, Azure Monitor, OpenTelemetry, Splunk, Dynatrace, metrics, logging, alerting, tracing, health checks.

Production Operations – Incident management, on-call rotation, SLA management, post-incident reviews, triage, application support, production monitoring.

Data & Automation – SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, pandas, NumPy, API integration, Claude API, prompt engineering, GitHub Actions.

EDUCATION AND TRAINING

PROJECTS

Enterprise Payments & Operations Platform (HCL Technologies | Sep 2021 – Jan 2025)

- Deployed and maintained **production CI/CD pipelines** supporting continuous delivery of SWIFT messaging and payments-operations dashboard for banking client; implemented automated testing, containerization, and **Infrastructure-as-Code** patterns, achieving **99.5% deployment success rate**.
- Architected **observability and incident management** infrastructure using **Splunk, Dynatrace, and CloudWatch**, capturing **metrics, logging, alerting, and tracing** across payment message flows; operated **on-call rotation**, triaged P1/P2 incidents, and conducted post-incident reviews with **sub-5-minute mean time to response**.
- Implemented **Python automation scripts** and **Bash shell scripts** for operational tasks including SWIFT message reconciliation, ISO 20022 compliance validation, and regulatory audit trail generation; reduced manual compliance work by **25 hours/month**.
- Collaborated cross-functionally with banking domain teams, QA, security, and support; documented **runbooks, procedures, and operational playbooks** in **Confluence** for incident response, change management, and post-go-live support across interconnected ERP and payments systems.

Ireland Jobs Tracker – DevOps Automation Pipeline (Personal Project | 2025)

- Built end-to-end **CI/CD automation** orchestrating **Python data pipelines** (Apify scrapers), **Claude API** integration with **prompt engineering**, structured-JSON constraint guardrails, and **reportlab PDF generation**; deployed to **Vercel** using **GitHub Actions** for automated testing and continuous deployment.
- Engineered **Infrastructure-as-Code** patterns and **GitOps workflows** for repeatable, auditable deployments; implemented **API integration** and **automation orchestration** demonstrating practical application of DevOps principles in a modern cloud-native architecture.
- Designed **observability and monitoring** for automated workflow health checks, error logging, and deployment notifications; implemented alerting for pipeline failures, reducing debugging time by enabling rapid triage and post-incident analysis.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
