## PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **shared platform components** and **microservices** using **Java Spring Boot** consumed by multiple product and operations teams, ensuring **scalability, reliability, and maintainability** across enterprise SaaS applications supporting **high-volume, multi-tenant environments**.
- Architected and deployed **distributed systems** using **event-driven patterns** and **container orchestration** with **Docker** and **Kubernetes** on **AWS** (EC2, Lambda, CloudWatch), enabling **enterprise-scale workloads** with **99.9% uptime SLA** in production.
- Owned critical **backend services** from conception through deployment, including **REST API development**, **code quality** improvements via peer reviews, **performance optimization** reducing P1 incident response time by **40%**, and **operational excellence** through **Splunk** and **Dynatrace observability**.
- Collaborated extensively across product engineers, **DevOps**, and architects to define **platform capabilities** and establish **technical standards** and best practices; mentored junior engineers through **code reviews**, **pair programming**, and technical guidance on **CI/CD pipelines** and **Git workflows**.
- Analyzed **system performance and data patterns** using **SQL** (PostgreSQL, MySQL, Oracle) and **Python data pipelines** to identify **optimization opportunities**, reducing database query latency by **35%** and informing **platform resilience** investments across interconnected systems.
- Contributed to **architectural decisions** for enterprise identity and access management workflows, implementing **audit trails**, **regulatory compliance** (GDPR, Data Protection), and **change-control management** for system configuration updates in **multi-tenant SaaS environments** serving financial-services clients.

## SKILLS

**Backend & Microservices** – Java Spring Boot, REST API design and governance, distributed systems architecture, event-driven patterns, microservices development, shared libraries and platform components.

**Cloud & Container Orchestration** – Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch), container orchestration, infrastructure automation, cloud-native application design.

**Data & Database Engineering** – PostgreSQL, MySQL, Oracle, SQL optimization, data pipeline development, ETL, data warehousing, schema design, query performance tuning.

**DevOps & Observability** – CI/CD pipelines (Jenkins), Git workflows, Splunk, Dynatrace, Prometheus, Grafana, distributed tracing, observability tools, infrastructure-as-code.

**Enterprise Domain & Compliance** – Enterprise Identity and Access Management (IAM), audit trail implementation, regulatory compliance (GDPR, Data Protection), change-control management, multi-tenant SaaS architecture.

**Languages & Analytics** – Python (pandas, NumPy, scikit-learn), R, Power BI, Tableau, data analysis, statistical methods, machine learning, business intelligence.

## EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin

02/2026

## PROJECTS

### **Enterprise Payments & Identity Platform (HCL Technologies)**

- Designed and deployed **shared platform microservices** powering a **SWIFT messaging** and payments-operations dashboard serving enterprise financial clients, architecting **distributed, event-driven backend services** to handle **high-volume, multi-tenant transaction flows** with **regulatory compliance** (GDPR, ISO 20022, SEPA protocols).
- Built **REST APIs** and **platform integrations** connecting **ERP modules**, payment systems, and operational databases (PostgreSQL, Oracle), implementing **API governance** standards and **change-control management** for cross-system data consistency and audit trail requirements.
- Established **observability and incident management** across platform services using **Splunk, CloudWatch**, and **Dynatrace**, reducing **P1 incident response time by 40%** and improving **SLA compliance** through real-time monitoring, performance optimization, and **distributed tracing** of payment message flows.

### **Ireland Jobs Tracker – AI-Driven Resume Automation (Personal Project)**

- Engineered an end-to-end **distributed, event-driven automation platform** integrating **Claude API** (Anthropic) with **Apify scrapers**, JSON data pipelines, and reportlab PDF generation, demonstrating **system architecture, API design**, and **scalable backend component development** for production workflows.
- Implemented **CI/CD infrastructure** using **GitHub Actions** and deployed shared platform services to **Vercel**, applying **infrastructure-as-code** practices, containerization principles, and **observability patterns** for reliable, maintainable deployment pipelines.
- Optimized data processing performance by implementing **async event handling** and batch operations, reducing end-to-end workflow latency by **50%** while maintaining **code quality** and **operational reliability** across interconnected API services.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
