PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed daily cash square up, liquidity confirmation, and execution of internal funding trades using **Treasury Management System** deal capture and bank account structure oversight; processed **150+ monthly treasury and accounts payable payments** within strict payment and funding cut-off times, achieving **100% on-time delivery** and **zero payment failures**.
- Executed vendor reconciliation, statement reviews, and business-unit query resolution across enterprise ledger systems; validated **vendor master data** and cost allocation postings from invoices and corporate credit cards, reducing reconciliation cycle time by **35%** and improving first-time accuracy to **99.2%**.
- Supported third-party and shareholder debt facilities using **cash management, interest rate risk management, and ad hoc liquidity reporting**; collaborated cross-functionally with Corporate Finance deal teams on funding initiatives, generating monthly **treasury risk reports** and **cash flow forecasting analyses** for executive review.
- Designed and deployed **payment process improvements** using **Python scripting** and **SQL automation** to streamline remittance advice generation and vendor ledger reconciliation; eliminated **40+ manual data-entry steps** per month, reducing operational risk and improving team productivity by **20%**.
- Administered **loan facilities, derivatives management, and bank account structure** operations with meticulous attention to detail and **right-first-time performance**; managed budget data postings and business-unit queries with strong collaborative communication across internal teams.
- Demonstrated proficiency in **accounting and ledger systems, finance system data entry, and regulatory compliance** frameworks; processed multi-currency payments and vendor transactions with comprehensive audit trail documentation, supporting financial governance and stakeholder reporting requirements.

SKILLS

Treasury & Cash Management – liquidity management, cash square-up, internal funding trades, interest rate risk management, bank account structure, Treasury Management System, derivatives administration.

Payments & Accounts Payable – vendor reconciliation, statement reviews, remittance advice, payment cut-off management, multi-currency payments, vendor master data, cost allocation.

Financial Systems & Accounting – ledger systems, finance system data entry, budget tracking, corporate credit card posting, cost centre allocation, audit trail documentation.

Data & Reporting – SQL (PostgreSQL, MySQL, Oracle), Python scripting, ad hoc liquidity and risk reporting, cash flow forecasting, executive KPI dashboards, Power BI.

Process Improvement & Compliance – payment process automation, vendor query management, regulatory compliance, GDPR, change-control management, cross-functional collaboration.

Technical & Tools – Python, SQL, Git, Jira, Confluence, Linux, AWS, Docker, Jenkins CI/CD, data modelling.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Treasury Liquidity & Payments Automation Platform (HCL Technologies)

- Architected end-to-end **cash management and payment automation system** integrating Treasury Management System, vendor ledger, and accounts payable workflows using **Python ETL pipelines**, **SQL-based reconciliation logic**, and **Power BI operational dashboards**.
- Automated daily **cash square-up** and **liquidity reporting** processes using **scheduled Python scripts** and **shell automation**; consolidated **multi-entity bank statements**, validated funding requirements against **payment cut-off schedules**, and generated executive **cash flow forecasting reports** in **Power BI**, reducing manual reconciliation time by **50%** and improving visibility to **4-hour SLA**.
- Developed **vendor reconciliation automation** using **SQL stored procedures** and **Python data validation** to match vendor invoices, credit card postings, and ledger entries; eliminated **~300 monthly manual queries**, improved first-time reconciliation accuracy to **98.8%**, and reduced month-end close cycle by **3 days**.
- Built **treasury risk and interest rate reporting dashboard** in **Power BI** with **DAX measures** for portfolio hedging analysis, derivatives valuation tracking, and facility utilization metrics; delivered **real-time compliance dashboards** supporting liquidity policy adherence and regulatory reporting requirements.
- Integrated **Jenkins CI/CD pipelines** to automate deployment of payment process enhancements across test and production environments; established **change-control governance** and UAT coordination for payment-system updates, ensuring **zero production incidents** and **100% on-time facility go-lives**.

Enterprise Vendor Master Data & Cost Allocation System (HCL Technologies)

- Designed centralized **vendor master data management** and **cost allocation ledger system** using **Oracle/PostgreSQL** relational databases, **Python data pipelines**, and **Tableau interactive dashboards** to support business-unit and vendor queries across **500+ vendor accounts**.
- Developed **automated cost posting validation** and **invoice-to-ledger reconciliation** using **SQL queries** and **Python**; identified and corrected **200+ monthly data discrepancies**, improving cost allocation accuracy by **12%** and enabling faster month-end finance reporting.
- Created **vendor query resolution workflows** and **statement review checklists** with documented audit trails; reduced vendor enquiry response time from **48 hours to <4 hours** and achieved **97% first-contact resolution rate** through process standardization and cross-functional collaboration.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
