## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Architected and developed **RESTful API endpoints** in **Java Spring Boot** for enterprise payment and transaction-processing systems, delivering **high-performance, scalable, and maintainable** services supporting **25+ concurrent banking workflows** with **99.9% uptime SLA**.
- Designed and implemented **relational database schemas** across **PostgreSQL, MySQL, and Oracle** for complex financial data models; optimized query performance and ensured **data integrity** through rigorous validation and change-control processes across production environments.
- Developed dynamic, responsive, and user-friendly web applications using **React** and **Angular** frameworks, collaborating with front-end engineers to deliver intuitive dashboards and operational interfaces for banking and ERP domains.
- Built end-to-end **full-stack solutions** combining **Python** backend services, **REST API** integrations, and **React** front-end components; deployed via **Docker** containerization and **Jenkins CI/CD pipelines**, reducing deployment time by **40%**.
- Managed **cloud infrastructure** on **AWS (EC2, S3, Lambda, CloudWatch)** and containerized applications with **Docker and Kubernetes**; applied **DevOps tools and practices** including **Terraform, Ansible, and Jenkins** for automated deployment and infrastructure-as-code.
- Participated in **Agile and Scrum** ceremonies; provided accurate timelines for assigned tasks, maintained comprehensive **application design and configuration documentation**, and responded to on-call production incidents with **P1/P2 incident response** protocols and strong communication with cross-functional stakeholders.

## SKILLS

**Backend Development** – Java Spring Boot, Python, Flask, FastAPI, REST API design and implementation, RESTful architecture.

**Frontend Development** – React, Angular, HTML, CSS, JavaScript, TypeScript, Jest, Babel, responsive web design, UI/UX design principles.

**Database & Data Management** – PostgreSQL, MySQL, Oracle, relational database design, NoSQL databases, data modelling, data integrity, schema management.

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD pipelines, Terraform, Ansible, automated deployment tools.

**Domain & Compliance** – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2, Open Banking, GDPR, regulatory compliance, payments processing, ERP integration.

**Monitoring & Operations** – Splunk, Dynatrace, CloudWatch, application monitoring, production support, incident management, SLA management, change-control management.

**Agile & Collaboration** – Scrum, SAFe, Jira, Confluence, Agile development methodologies, cross-functional collaboration, requirements gathering, UAT support.

## EDUCATION AND TRAINING

## PROJECTS

### **SWIFT Payments Operations Dashboard (HCL Technologies)**

- Architected a **full-stack payments operations dashboard** combining **Java Spring Boot REST APIs** for transaction-flow visibility with **React front-end** and **PostgreSQL relational database schemas** for payment-message processing and settlement workflows.
- Implemented **ISO 20022 message parsing** and **SWIFT MT/MX message format** handling in backend services; designed operational-alerting system using **CloudWatch** and **Splunk** to provide **transaction-flow visibility** and real-time monitoring of **SEPA** and **cross-border payment flows**.
- Deployed solution via **Docker containerization**, **Kubernetes orchestration**, and **Jenkins CI/CD pipelines**; ensured **GDPR data-protection compliance** and regulatory audit-trail integrity across production banking environment supporting **99.9% SLA uptime** for payments processing.

### **Ireland Jobs Tracker – AI-Driven Resume Generation Platform (Personal Project)**

- Engineered end-to-end **full-stack web application** integrating **Claude API (Anthropic)** for AI-driven, job-description-tailored resume generation at scale; built **structured-JSON prompt engineering** with constraint guardrails to deliver personalized content across **100+ job postings**.
- Orchestrated AI workflow automation pipeline: **Apify web scrapers** for job-description ingestion → **Python** backend ETL processing → **Claude-haiku-4-5 API** for tailored content generation → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel** deployment.
- Developed responsive **React** front-end for user job-listing visualization and resume-download management; implemented **REST API endpoints** for data flow between scraper, AI service, and PDF generator; demonstrated hands-on expertise in **prompt engineering**, **API integration**, and **full-stack deployment automation**.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
