PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided **production support and incident response** for enterprise Java/.NET trading and payments applications, managing **P1/P2 incidents** in time-sensitive environments using **Splunk, CloudWatch, and Dynatrace** monitoring tools; maintained **SLA compliance** across global trading operations with **sub-hour MTTR** for critical system outages.
- Built and deployed **Python automation tools** for **system monitoring, alerting, and incident triage**, reducing manual intervention by **40%** through log-analysis scripts, scheduled health-check pipelines, and custom **Splunk** dashboards for **distributed trading systems**.
- Diagnosed and resolved application and system issues through **log analysis, networking troubleshooting, and system behaviour investigation** across **distributed architectures**; performed **capacity planning and system scalability assessments** to support business growth and trading volume increases.
- Maintained and enhanced **monitoring and alerting** infrastructure using **CloudWatch, Dynatrace, and custom Python alerting scripts** to proactively detect performance degradation and trading-system anomalies; reviewed incident trends to implement **automation and operational efficiency improvements**.
- Deployed, monitored, and maintained **custom trading applications on AWS (EC2, Lambda, S3)**, ensuring **stability, performance, and availability** through **Docker containerization, Jenkins CI/CD pipelines, and Git-based change management**; collaborated with development and infrastructure teams on system optimization and resilience.
- Managed **ticketing systems and multiple concurrent support requests** using **Jira** while working under pressure in fast-paced environments; developed and maintained **documentation, support procedures, and operational runbooks** for trading systems; acted as key point of contact between development, infrastructure, and business teams.

SKILLS

Production Support & Incident Management – P1/P2 incident response, SLA management, troubleshooting, log analysis, system behaviour investigation, MTTR optimization.

Scripting & Automation – Python, shell scripting, cron jobs, automation tool development, workflow orchestration, data pipeline automation.

Monitoring & Alerting Tools – Splunk, CloudWatch, Dynatrace, custom alerting scripts, proactive detection, operational dashboards.

Distributed Systems & Networking – distributed architecture support, networking fundamentals, system interactions, cross-system integrations, capacity planning, scalability assessment.

Database Systems & Data Applications – PostgreSQL, MySQL, Oracle, SQL query optimization, data validation, schema analysis, database-driven applications.

Cloud & Infrastructure – AWS (EC2, Lambda, S3, CloudWatch), Docker containerization, Jenkins CI/CD pipelines, Git branching and change management, Linux system administration.

Communication & Ticketing – Jira ticketing systems, concurrent request management, cross-functional collaboration, documentation and runbooks, stakeholder communication.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments & Trading Operations Dashboard (HCL Technologies)

- Delivered **production support and real-time monitoring** for a mission-critical **SWIFT messaging** and payments-operations dashboard serving a global banking and trading client; maintained **ISO 20022 message flows** and **SEPA/cross-border payment processing** with **24/7 availability** across distributed systems.
- Diagnosed and resolved complex issues through **log analysis** of SWIFT MT/MX message formats and transaction-flow workflows; implemented **custom Splunk dashboards** for **transaction-flow visibility** and **operational alerting**, reducing incident detection time by 35%.
- Collaborated with banking-domain business analysts, operations teams, and regulators to support **change management**, **UAT coordination**, and **post-implementation triage**; ensured **regulatory compliance (GDPR, audit trails)** and maintained detailed **support documentation and runbooks** for payments operations.

Enterprise Trading Systems Integration & Automation (HCL Technologies)

- Supported deployment, monitoring, and maintenance of **custom trading and ERP applications** across interconnected enterprise systems; optimized **distributed system performance** through **capacity planning, scalability assessment, and infrastructure upgrades** to handle increased trading volumes.
- Engineered **Python automation scripts** for system health monitoring, data validation, and incident triage; built **custom alerting workflows** using **CloudWatch and Dynatrace** to proactively detect trading-system anomalies and reduce manual troubleshooting by 45%.
- Managed **CI/CD pipelines (Jenkins)**, **Docker containerization**, and **AWS deployment (EC2, Lambda, S3)** for trading applications; conducted **incident trend analysis** to identify systemic issues and implemented automation improvements; maintained **support procedures, operational runbooks, and cross-team communication** protocols.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
