## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Managed **global settlements and trade matching** for enterprise banking clients, ensuring **99.2% settlement accuracy** across OTC, client, and exchange trades in equities, bonds, and ETF products; coordinated with prime brokers, execution brokers, and DMA providers to direct settlement functions and maintain SLA compliance.
- Built operational dashboards and **monthly management reports** analyzing trading volume, **buy-in notices**, interest claims, trade fails, and PnL impact using **SQL** and **Python**; identified process inefficiencies and recommended trading strategy changes that reduced settlement-related costs by **18%**.
- Performed **daily monitoring and analysis** of buy-in notices and settlement exceptions from exchanges, clients, and DMA providers; investigated interest claims and fines through root-cause analysis and collaborated cross-functionally with trading desks, securities lending, corporate actions, and technology teams to achieve **96% on-time settlement rate**.
- Managed **position reconciliation** across multi-listed securities by analyzing long/short positions and directing reregistration to cover short positions; executed **SSI (Settlement System Interface)** controls and European settlements workflows including **SEPA**, instant payments, and cross-border payment flows with full regulatory and audit-trail compliance.
- Automated settlement data extraction and validation workflows using **Python scripting**, **SQL queries** (PostgreSQL, MySQL, Oracle), and scheduled reporting; reduced manual reconciliation effort by **22 hours per month** and improved data accuracy by implementing constraint-based validation logic.
- Led strategic process improvement initiatives by researching new markets, products, and settlement technologies; designed and implemented automation opportunities using **REST APIs** and database integrations across interconnected trading, risk, and operations systems; demonstrated ownership from concept to production deployment.

## SKILLS

**Settlements & Trade Operations** – global settlements, trade matching, OTC trade settlement, client settlements, exchange settlements, buy-in management, interest claims analysis, trade fails analysis, position reconciliation, multi-listed securities management, reregistration workflows, settlement rate optimization.

**Settlements Technology & Platforms** – CTM (Continuous Trade Matching), Traiana, SSI (Settlement System Interface), SWIFT messaging (MT/MX formats), ISO 20022 message flows, DMA (Direct Market Access) provider integration, prime broker settlement directives.

**European & International Settlements** – SEPA settlements, instant payments, cross-border payments, European DTC settlements, regulatory and economic impact analysis, GDPR and financial services compliance, audit-trail management.

**Data Analysis & Reporting** – SQL (PostgreSQL, MySQL, Oracle), Python data pipelines, ETL workflows, operational dashboards, monthly management reporting, Power BI dashboards, Tableau visualizations, statistical analysis, anomaly detection.

**Front Office Collaboration & Client Management** – trader relationship management, cross-functional liaison (securities lending, corporate actions, technology, trading desks, trade support), client-focused service delivery, UAT support, post-implementation triage, requirements gathering from business stakeholders.

**Technical Stack** – Python, SQL, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git, Jira, Microsoft Excel (advanced), Splunk, Dynatrace, pandas, NumPy.

**Core Competencies** – problem-solving under pressure, analytical troubleshooting, process improvement and automation, attention to detail, organizational skills, self-motivated initiative, financial markets knowledge, multi-tasking in fast-paced environments.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

### **Global Settlements Operations Dashboard (HCL Technologies)**

- Designed and deployed an end-to-end **settlements monitoring and reporting platform** for a tier-1 European banking client, tracking **OTC, client, and exchange trades** across equities, bonds, and ETF products with real-time **buy-in notice ingestion** and **settlement exception alerting**.
- Implemented **SQL-based data pipelines** to ingest trade data from multiple sources (prime brokers, DMA providers, internal trading systems), normalize settlement records, and reconcile positions across **multi-listed securities**; automated **monthly management reports** on trading volume, interest claims, fines, and PnL impact using **Python ETL workflows** and **Power BI dashboards**.
- Built **position management analytics** to analyze long/short positions and generate reregistration instructions for covering short positions; integrated **SEPA and cross-border payment flow visibility** with full **ISO 20022 message structure** validation, **regulatory compliance** controls, and audit-trail logging for financial services standards.
- Reduced manual settlement reconciliation effort by **22 hours per month** through automated validation and anomaly detection; achieved **96% on-time settlement rate** and **99.2% settlement accuracy** through proactive exception management and cross-functional escalation workflows with trading desks and operations teams.

### **Settlement Exception Analysis & Process Optimization (HCL Technologies)**

- Performed daily **monitoring and analysis of buy-in notices** from exchanges, clients, and DMA providers; investigated root causes of settlement exceptions, interest claims, and buy-in fines through detailed transaction-flow analysis and pattern detection using **SQL queries** and **Python scripts**.
- Identified recurring settlement risks and recommended changes to trading strategies to reduce settlement-related costs by **18%**; led cross-functional initiatives with trading desks, securities lending, corporate actions, and technology teams to implement process improvements and automation opportunities.
- Researched and evaluated new settlement markets, products, and technologies; designed automation solutions using **REST API integrations** to connect settlement systems with trading, risk, and operations platforms; demonstrated strong **client focus** by maintaining relationships with prime brokers, execution brokers, and direct clients to ensure high settlement service levels.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
