PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided technical support and incident response for enterprise Java/.NET applications in production environments, analyzing vulnerability scan results, system audits, and log events using **Splunk**, **CloudWatch**, and **Dynatrace**; achieved **99.5% SLA compliance** through rapid P1/P2 issue triage and root-cause analysis.
- Recreated customer software issues in lab environments and debugged complex, multi-layered infrastructure problems across **Linux/Windows** OS administration, **TCP/IP networking**, patch deployment, and system configuration; delivered resolution documentation for knowledge reuse across support teams.
- Maintained in-depth knowledge of enterprise security tools and information security best-practices; applied **network security** principles in production troubleshooting, vulnerability assessment workflows, and compliance auditing across banking and ERP systems.
- Analyzed and clarified customer technical inquiries by serving as primary technical liaison between customers and internal groups (Product Management, R&D, Operations); coordinated UAT support, post-implementation triage, and cross-functional requirements gathering with business stakeholders.
- Harnessed **AI-driven technologies** and **Claude API** to automate routine troubleshooting tasks and amplify technical support impact; engineered prompt-based workflows to accelerate case resolution and deliver exceptional customer experiences in high-volume support environments.
- Managed multiple ticketing priorities in fast-paced, production-focused environments using **Jira** and change-control workflows; created and published solution knowledge bases, runbooks, and technical documentation for reuse by customers and support teams; demonstrated strong analytical problem-solving with quick learning of complex systems.

SKILLS

Operating Systems & Networking – Linux/Windows/macOS administration, TCP/IP networking, patch deployment, system configuration, log analysis, shell scripting.

Security & Vulnerability Assessment – Vulnerability scan result analysis, system audit interpretation, network security, compliance auditing, log event correlation, information security best-practices.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, log analysis, real-time alerting, SLA management, incident response.

Database & SQL – PostgreSQL, MySQL, Oracle, SQL queries, schema analysis, data validation.

Cloud & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, system infrastructure troubleshooting.

Support & Ticketing Systems – Jira, customer issue triage, knowledge management, change-control coordination, UAT support, technical documentation.

AI & Automation – Claude API, prompt engineering, AI-augmented support workflows, GitHub Actions, task automation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Banking & Payments Dashboard Support (HCL Technologies)

- Provided production technical support for a **SWIFT messaging** and payments-operations dashboard serving a Tier-1 banking client; analyzed **MT/MX message formats**, **ISO 20022 message flows**, and transaction-flow visibility issues in real-time.
- Troubleshoot complex payment processing infrastructure across **SEPA** / instant payments / cross-border payment rails; maintained operational alerting and SLA compliance for regulatory and audit-trail requirements in a **GDPR**-compliant, production-critical environment.
- Collaborated with banking-domain business analysts and operations teams to clarify technical inquiries, recreate customer issues in lab environments, and deliver compliance-auditable resolution documentation for **PSD2**-regulated systems.

Ireland Jobs Tracker – AI-Augmented Resume Generation (Personal Project)

- Built end-to-end **AI-driven automation** workflow integrating **Claude API** (Anthropic) to analyze job descriptions at scale and generate tailored technical resumes; architected **structured-JSON prompt engineering** with constraint guardrails to ensure consistent, high-quality output.
- Orchestrated multi-stage pipeline: Apify job scrapers → JD ingestion → **Claude AI** resume generation → **reportlab** PDF rendering → **GitHub Actions** CI/CD → **Vercel** deployment; demonstrated hands-on mastery of **AI-augmented support models** to accelerate task resolution.
- Applied analytical problem-solving and rapid learning to integrate multiple APIs, manage complex data workflows, and deliver a production-grade system; showcased ability to harness AI technologies to amplify impact and automate routine technical tasks.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
