PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **Java & Kotlin** microservices on **Spring Boot** processing **millions of financial transactions daily**—architected **REST APIs** for payments processing integrations, ensuring **reliable, scalable, and trustworthy** feature delivery across production environments.
- Engineered **React** frontend components integrated with **Java backend services** for a **payments pricing platform**; implemented end-to-end feature workflows from solution design through **automated testing**, code review, and production deployment using **CI/CD** best practices.
- Designed and deployed **DynamoDB** schemas for high-throughput payments data persistence; optimized query patterns and indexing to support **millions of daily financial transactions** with **sub-second latency** and **99.99% SLA uptime**.
- Implemented message-based integrations using **Apache Pulsar** and **Apache Camel** for payments routing and transformation; built **end-to-end testing** and **performance testing** suites to validate transaction flows across interconnected financial systems.
- Deployed and monitored payments applications on **AWS** infrastructure (**EC2, ECS, DynamoDB, CloudWatch**); led **continuous delivery** pipelines via **Jenkins** and **Git**, managed production incidents with **P1/P2 SLA** response protocols, and maintained **security reviews** for fintech data protection.
- Leveraged **Claude AI** and **AI tooling** to accelerate payments feature development—integrated **prompt engineering** workflows into development cycle, automated code generation and testing tasks, and collaborated with team to embed AI-driven quality practices into the payments platform pipeline.

SKILLS

Backend Languages & Frameworks – Java, Kotlin, Spring Boot, REST APIs.

Frontend & Full-Stack – React, Angular, responsive UI design.

Data & Persistence – DynamoDB, SQL (PostgreSQL, MySQL, Oracle), data modelling.

Message & Streaming Platforms – Apache Pulsar, Apache Camel, message routing and transformation.

Cloud & DevOps – AWS (EC2, ECS, DynamoDB, CloudWatch), Docker, Jenkins, Git, continuous delivery.

Testing & Quality – automated testing, end-to-end testing, performance testing, security reviews, quality best practices.

AI & Developer Tools – Claude, AI tooling, prompt engineering, AI-assisted development.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Toast Payments Processing Platform – Real-Time Payment Technologies (HCL Technologies)

- Architected and deployed **Java & Kotlin** microservices on **Spring Boot** for Toast's integrated payment processor, handling **billions of dollars annually** across restaurant credit card payment workflows.
- Engineered **React** frontend integrated with **DynamoDB-backed** services for Toast's **innovative pricing platform**; implemented **reliable, scalable, and trustworthy** features from solution design through **continuous delivery, automated testing**, and production support.
- Designed **Apache Pulsar**-based message integrations and **Apache Camel** routing logic for payments transaction flows; built **end-to-end testing** and **performance testing** frameworks ensuring money moves accurately to restaurant bank accounts with **99.99% uptime**.
- Implemented **AWS ECS** containerized deployments with **CloudWatch** monitoring and **Jenkins CI/CD** pipelines; managed production incidents, security reviews, and compliance validation for fintech payments operations.

Ireland Jobs Tracker – AI-Powered Resume Generation & Automation (Personal Project)

- Built end-to-end **full-stack** application integrating **Claude API (Anthropic)** for **AI-assisted** job description analysis and **prompt engineering**—orchestrated workflow from job ingestion through **structured-JSON** processing and constraint guardrails.
- Engineered **Python**-based backend pipelines (Apify scrapers → Claude transformations → **reportlab** PDF generation) with **GitHub Actions** CI automation and **Vercel** deployment for **reliable, scalable** content delivery.
- Demonstrated proficiency with **AI tooling** and **prompt engineering** best practices—designed multi-stage prompts for tailored resume generation at scale, integrated API response validation, and built modular automation workflows applicable to fintech and payments engineering contexts.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
