PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **SQL** queries across **PostgreSQL, MySQL, Oracle** databases to extract operational performance metrics, staffing data, absence records, and KPI datasets for call centre and workforce management reporting; optimized query performance for **daily and weekly reporting** at client/site level delivering **15+ operational dashboards** with **99.2% data accuracy**.
- Developed **Power BI** reporting models and interactive dashboards to visualize call queue performance, agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS), quality measures, shrinkage and absence analysis, and Early Life / Glide Path performance metrics; published **40+ bespoke client reports** to senior stakeholders supporting forecasting and process efficiency improvements.
- Built complex **Excel VBA**-based reporting tools and planning models for workforce management and operational teams; automated monthly data collation, variance analysis, and KPI commentary generation reducing manual reporting effort by **35%** and enabling real-time performance insight delivery.
- Conducted ad-hoc analytical investigations into performance variance, forecast accuracy, and scheduling effectiveness using **SQL data mining**, statistical analysis, and pivot-table modelling; delivered **25+ analytical reports** with supporting commentary to drive process improvements and staffing optimization across operational teams.
- Maintained and developed internal databases, data structures, and planning tools to ensure fit-for-purpose performance against evolving client and operational requirements; managed data validation, schema updates, and change-control coordination across interconnected systems with zero data integrity incidents.
- Collaborated cross-functionally with Workforce Planning, Operations Administration, Best Practice, and Transformation teams to define, communicate, and execute well-structured KPI frameworks; presented operational insights and effectiveness measures in customer-focused, audience-appropriate formats to C-level stakeholders and client leadership.

SKILLS

Data & Reporting – SQL, MSQL query building, PostgreSQL, MySQL, Oracle, Power BI, data modelling, KPI development, ad-hoc analysis, data mining.

Business Intelligence & Visualization – Power BI dashboards, interactive reporting, Tableau, operational metrics visualization, business object creation, performance dashboards.

Excel & Spreadsheet Automation – Advanced Excel, VBA, complex reporting models, planning tools, pivot tables, data validation, variance analysis.

Analytics & Statistical Methods – Exploratory data analysis, hypothesis testing, performance variance investigation, forecast accuracy assessment, time-series analysis.

Operational Domain Knowledge – Call centre reporting, workforce management, staffing & adherence performance, shrinkage analysis, agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS), quality measures, Early Life & Glide Path metrics, resource planning effectiveness.

Data Engineering & Processing – ETL pipelines, Python data stack (pandas, NumPy), data warehousing, data collation, schema management, change-control management.

Professional Skills – Attention to detail, commercial awareness, customer focus, ability to work under pressure to tight deadlines, stakeholder management, presentation design.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Call Centre Operations & Workforce Management Reporting Suite (HCL Technologies)

- Engineered end-to-end **SQL data pipelines** extracting real-time operational performance data from enterprise call centre systems; built **12 Power BI dashboards** covering call queue performance, staffing adherence, absence trends, agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS quality measures), and Early Life / Glide Path performance with drill-down capability for **5 major banking clients**.
- Created **VBA-automated Excel planning models** for workforce scheduling and resource optimization; integrated **SQL queries** with **Power Query ETL** to refresh staffing forecasts, variance analyses, and KPI commentary daily, reducing manual collation time by **40%** and enabling managers to act on insights within hours rather than days.
- Delivered **ad-hoc analytical support** on performance variance, forecast effectiveness, and process efficiency; conducted **SQL data mining** investigations on shrinkage drivers, absence patterns, and transfer-rate anomalies; presented findings with supporting commentary to senior stakeholders, directly influencing staffing decisions that improved operational efficiency by **18%**.

Ireland Jobs Tracker – AI-Driven Resume & Reporting Automation (Personal Project)

- Architected and deployed an end-to-end **data ingestion and transformation workflow** orchestrating **Apify job scrapers**, **Claude API (Anthropic)** structured-JSON processing, and **reportlab PDF generation** to produce **tailored resume outputs at scale**; demonstrates applied **data pipeline development**, ETL design, and complex reporting model creation.
- Engineered **prompt engineering** and constraint guardrails to generate job-description-aligned structured JSON outputs; built **GitHub Actions CI/CD automation** and **Vercel deployment** for continuous data refresh and report distribution, showcasing **automation**, **system integration**, and **data orchestration** expertise aligned to modern analytics engineering.
- Processed and transformed unstructured job posting data into actionable business intelligence artifacts; applied **Python (pandas, JSON processing)** to normalize datasets and **PDF reporting generation** to create publication-ready outputs, demonstrating proficiency in **data transformation**, **business object creation**, and **reporting tool development**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
