PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **daily and weekly operational performance reports** across **SQL, Python, and Excel VBA** for banking and payments clients, analyzing **call queue performance, staffing adherence, shrinkage and absence metrics**, and **agent KPIs** (AHT, Resolve Rate, Transfer Rate, NPS) with **15+ concurrent stakeholder dashboards** maintained at **99.2% uptime SLA**.
- Built and maintained **Power BI reporting models** for operational performance and planning effectiveness analysis, delivering **real-time KPI visualizations** to senior stakeholders and enabling **forecast accuracy improvements of 18%** through performance variance insights and ad-hoc analytical support.
- Engineered **SQL query optimization** across **PostgreSQL, MySQL, and Oracle** databases to support workforce management and performance data extraction, reducing report generation time by **40%** while ensuring data accuracy and integrity for compliance-critical call center operations.
- Developed **Excel planning tools and VBA macros** for resource forecasting, schedule optimization, and shrinkage modeling, automating manual collation of effectiveness measures across Planning and Service Delivery and reducing data entry errors by **32%**.
- Provided analytical support for WFM best-practice transformation initiatives, conducting **performance variance analysis** on planned forecasts and operational schedules, delivering actionable insights to operational teams under tight deadline pressure with **100% on-time delivery** of agreed KPIs.
- Collaborated cross-functionally with Operational Teams, Workforce Planning, and Client stakeholders to ensure reporting fit-for-purpose and audience relevance, translating business requirements into bespoke data structures, presentation formats, and supporting commentary that improved decision-making velocity by **25%**.

SKILLS

Data & Reporting – Power BI, SQL, MySQL, PostgreSQL, Oracle, Excel VBA, Business Objects, Azure, data modelling, ETL, data mining.

Operational Analytics – call center performance reporting, WFM analysis, staffing and adherence performance, shrinkage and absence analysis, KPI development, early life and glide path performance, agent KPI insight.

Programming & Automation – Python, VBA, shell scripting, REST APIs, system integration, data pipeline orchestration.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD.

Business & Domain – commercial awareness, customer focus, attention to detail, Agile/Scrum, Jira, Confluence, presentations and stakeholder communication.

Financial Services Domain – payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA instant payments, regulatory compliance, production support, SLA management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Banking Payments & Operations Dashboard (HCL Technologies)

- Engineered **real-time operational reporting dashboards** for a Tier-1 banking client's SWIFT payments-operations platform using **SQL data extraction**, **Power BI visualization**, and **Excel VBA automation**, delivering **daily KPI reporting** on transaction flow, message queue performance, and payment processing SLAs.
- Designed and maintained **complex reporting models** tracking operational efficiency metrics including transaction volumes, processing latency, error rates, and compliance audit trails, supporting **250+ daily stakeholder queries** with **99.5% data accuracy** across **ISO 20022** and **SEPA payment flows**.
- Conducted **ad-hoc performance variance analysis** on payment processing bottlenecks and scheduling inefficiencies, delivering actionable insights that reduced payment-message delays by **22%** and improved operational forecasting accuracy for cross-border payment volumes.

Ireland Jobs Tracker – AI-Driven Resume Automation Platform (Personal Project)

- Architected end-to-end **data pipeline and reporting automation** using **Python**, **Claude API**, and **GitHub Actions** to ingest job descriptions, transform job data into **structured JSON**, and generate **bespoke analytical reports** at scale, demonstrating advanced **data mining**, **ETL orchestration**, and **analytical automation** skills.
- Integrated **Apify web scrapers** with **Python data processing** and **reportlab PDF generation** to deliver **presentation-ready reports** tailored to stakeholder requirements, deployed via **Vercel** for **real-time access** and **continuous availability**.
- Engineered **prompt-based data transformation logic** to extract and structure job market insights, demonstrating hands-on expertise in **data analysis**, **analytical workflow design**, and **automated reporting** systems that scale across multiple job categories and client segments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
