PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and deployed **cloud SaaS features** using **Java Spring Boot**, **REST APIs**, and **PostgreSQL** within **sprint-based Agile/Scrum environments**, delivering **8+ production releases** annually with **99.5% uptime SLA** compliance.
- Integrated **CI/CD pipelines** via **Jenkins** and **Git** version control, automating code reviews and deployment workflows to reduce manual overhead by **40%** and accelerate feature velocity across interconnected cloud systems.
- Developed **unit tests** and meaningful test suites using **Spring Boot testing frameworks**, achieving **85%+ code coverage** while collaborating with **Product Managers and Senior Engineers** to prototype innovative features in discovery sessions.
- Implemented **coding assistants** and **AI-augmented development tools** into daily workflows to streamline code generation, documentation, and test automation, increasing development velocity by **30%** across feature delivery cycles.
- Engineered **React** and **Angular** frontend components for cloud platforms with deep understanding of component architecture, state management, and responsive design, ensuring seamless integration with **Java Spring Boot** backend services.
- Managed **change-control processes** and coordinated **UAT** across enterprise systems, delivering post-deployment support and operational alerting for mission-critical applications serving public infrastructure and government operational workflows.

SKILLS

Cloud & Backend – Java Spring Boot, .NET Core, C#, Node.js, REST APIs, PostgreSQL, SQL Server, AWS (EC2, S3, Lambda, CloudWatch), Docker.

Frontend – React, Angular, responsive design, component architecture.

DevOps & CI/CD – Jenkins, Git, GitHub, version control, CI/CD pipelines, automated testing, deployment automation.

Testing & Quality – unit testing, test automation, code coverage, meaningful test generation.

Agile & Collaboration – Agile/Scrum ceremonies, sprint-based development, Jira, cross-functional collaboration, discovery sessions, change management.

AI & Automation Tools – GitHub Copilot, Cursor, coding assistants, AI-augmented development, automation agents.

Domain Knowledge – public infrastructure workflows, government agency operations, cloud SaaS architecture, production support and monitoring.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Cloud Infrastructure Operations Dashboard & AI-Augmented CI/CD Platform (HCL Technologies)

- Architected and deployed a **cloud SaaS operations dashboard** using **Java Spring Boot, React**, and **PostgreSQL** to visualize real-time infrastructure health, asset lifecycle management, and public works project workflows for government agency clients.
- Integrated **AI agents and automation tools** into **Jenkins CI/CD pipelines**, automating code generation, unit test creation, and documentation workflows using **GitHub Copilot** and **Cursor**, reducing manual deployment overhead by **45%** and enabling **50+ weekly deployments**.
- Built **meaningful unit test suites** with **Spring Boot testing frameworks** achieving **88% code coverage**, leveraging **coding assistants** to generate test scenarios automatically and accelerate feature validation across **12 interconnected microservices**.
- Participated in **discovery sessions** with Product Managers and Senior Engineers, utilizing **AI-augmented prototyping tools** to rapidly validate innovative features for infrastructure asset tracking and permitting workflows, reducing prototype-to-MVP cycle time by **35%**.
- Implemented **Agile/Scrum sprint-based delivery** with **Git branching strategies** and **change-control processes**, coordinating **UAT support** and post-deployment operational monitoring for government clients managing highway maintenance and smart city infrastructure assets.

SWIFT Payments Operations Intelligence Dashboard (HCL Technologies)

- Designed and maintained a **cloud SaaS payments dashboard** processing **SWIFT MT/MX message flows** and **ISO 20022 message structures** for mission-critical banking operations, enabling **real-time transaction visibility** across **SEPA instant payments** and **cross-border payment workflows**.
- Developed **SQL queries** and **data pipeline integrations** using **PostgreSQL** and **Python** to reconcile **10M+ daily payment messages**, ensuring **100% audit trail compliance** and **GDPR data protection** standards for regulated financial services environments.
- Collaborated across **cross-functional teams** with banking-domain business analysts and operations teams, gathering requirements for post-go-live enhancements and managing **change-control processes** for system configuration updates supporting **PSD2 Open Banking** and tokenization workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
