PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **core banking product logic** for deposits, payments, and fee management on **enterprise Java Spring Boot** microservices; configured **ledger-posting rules** ensuring **accounting principle compliance, idempotency, and audit trail integrity** across **SWIFT messaging** and **ISO 20022** payment flows, reducing reconciliation variance by **18%**.
- Built and maintained **event-driven integration services** and **REST APIs** connecting core banking platforms to downstream systems (KYC, CRM, GL, data/analytics, fraud detection, notifications); implemented **pub/sub messaging, error handling, retry logic, and observability instrumentation** using **CloudWatch** and **Dynatrace**, achieving **99.95% SLA uptime**.
- Developed **comprehensive test suites** (unit, integration, contract tests) covering **edge cases, reconciliation scenarios, and financial controls**; implemented **ledger reconciliation** workflows validating **posting accuracy** and **regulatory compliance (GDPR, Data Protection, PSD2)**, reducing production incidents by **32%**.
- Engineered **financial event scheduling** and **lifecycle management** (interest accrual, compounding, billing cycles, statement generation, maturity triggers, arrears, write-offs); configured **product parameters** and **delinquency posting rules** using declarative **rules-engine** patterns, supporting **SEPA** and **instant payments** across **cross-border payment** corridors.
- Delivered **production-grade support** and **incident management** for core banking applications handling **payment operations** and **transaction processing**; performed **root-cause analysis**, implemented **monitoring and alerting** for financial events, and coordinated **UAT support** and **post-implementation triage** with Risk, Finance, and Regulatory stakeholders, achieving **zero critical compliance breaches**.
- Architected **data integration pipelines** and **reporting extracts** using **Python, SQL, and ETL orchestration** to supply Finance, Risk, and Operations with **ledger reconciliation reports, transaction flow visibility, and operational alerting dashboards**; automated **data validation** and **schema changes** reducing manual reconciliation effort by **40%**.

SKILLS

Core Banking & Product Engineering – ledger-posting logic, product lifecycle management, financial event scheduling, interest accrual and compounding, fee and delinquency posting rules, account onboarding and closure, arrears and write-off workflows, accounting principle compliance.

Banking Domain & Payments – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, instant payments, cross-border payments, payment operations, transaction processing, tokenization, Open Banking, PSD2, reconciliation workflows.

Integration & API Development – REST APIs, event-driven architectures, pub/sub messaging, integration services, downstream system connectivity (KYC, CRM, GL, data/analytics, fraud detection, notifications), error handling, retry logic, idempotency.

Financial Controls & Compliance – ledger reconciliation, audit trails, GDPR, Data Protection, regulatory compliance, SLA management, production incident response, post-implementation support, UAT coordination, Risk and Finance collaboration.

Software Engineering & Quality – Java Spring Boot, Python, REST API development, unit testing, integration testing, contract testing, test automation, edge-case validation, reconciliation testing, continuous integration

(Jenkins, Git), code review.

Data Engineering & Analytics – ETL pipelines, Python (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), data modelling, data warehousing, Power BI, Tableau, reporting, data validation, operational dashboards.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, Linux, shell scripting, monitoring (Splunk, Dynatrace), CI/CD (Jenkins pipelines), Git branching, Jira, Agile/Scrum.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Messaging & Payments-Operations Dashboard (HCL Technologies)

- Designed and implemented **core ledger-posting logic** and **financial event scheduling** for a **SWIFT messaging platform** handling multi-currency **payment operations** and **transaction processing**; built **idempotent posting rules** and **reconciliation workflows** ensuring **ISO 20022 compliance** and **accounting principle adherence**.
- Developed **REST API integration services** connecting the core platform to downstream systems (KYC, CRM, GL, fraud detection, notifications); implemented **event-driven pub/sub messaging** with **error handling**, **retry logic**, and **observability instrumentation** using **CloudWatch** and **Dynatrace**.
- Engineered **operational alerting dashboards** and **transaction-flow visibility reports** using **Python**, **SQL**, and **Power BI** to support **SLA management**, **P1/P2 incident response**, and **regulatory compliance** (GDPR, PSD2, SEPA); coordinated **UAT support** and **post-go-live triage** with banking domain BAs and Risk/Compliance teams, achieving **99.95% uptime**.

Ireland Jobs Tracker – AI-Driven Resume & JD Matching Pipeline (Personal Project)

- Built end-to-end **event-driven data pipeline orchestration** integrating **Apify job scrapers**, **Claude API (Anthropic SDK)**, **structured JSON prompt engineering**, and **reportlab PDF generation**; deployed on **GitHub Actions CI/CD** and **Vercel cloud platform**.
- Implemented **constraint-based prompt engineering** and **API integration** with **claude-haiku-4-5** to dynamically generate job-description-tailored resume content at scale; designed **guardrails** and **validation logic** ensuring output quality and consistency across **100+ job postings**.
- Demonstrated proficiency in **Python**, **API orchestration**, **CI/CD automation**, **data transformation**, and **cloud deployment**; showcased ability to design and operate **AI workflow pipelines** integrating third-party APIs, batch processing, and production-grade error handling.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
