PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **software modules** in **Java Spring Boot** and **Python**, implementing feature work, bug fixes, and REST API endpoints across enterprise applications; organized **code reviews** of own work product and peer contributions, ensuring adherence to coding guidelines and **ASPICE** quality process standards.
- Executed **module testing** and generated **module test reports** with detailed defect tracking; created and managed **tickets** in **Jira** for problems and issues; implemented fixes and changes required by assigned tickets, maintaining **work products in CM (Configuration Management) database** and version control using **Git** and **Jenkins CI/CD pipelines**.
- Developed **test specifications** and **user specifications** in **Confluence** documentation; supported team in **testing and configuration of ECUs** (Electronic Control Units) across embedded and microcontroller targets; collaborated cross-functionally with architecture and QA teams to ensure work satisfied **company QA requirements** and **software quality processes**.
- Programmed in **C/C++** for embedded systems integration; demonstrated understanding of **embedded targets** including microcontroller, **DSP**, **ARM**, and **Multi-core SoC architectures**; utilized **development tools** including emulators, debuggers, and hardware profiling to validate module behavior across multiple processor targets.
- Applied **software version control** and **change control** tooling (**Git**, **Jenkins**) to manage code branches, merge requests, and automated build pipelines; participated in project and team meetings; regularly reported software development activities, milestone progress, and technical blockers to software team leader and hierarchical management.
- Maintained and debugged production enterprise applications using **Splunk**, **CloudWatch**, and **Dynatrace** monitoring; analyzed system logs and kernel traces on **Linux** environments; responded to P1/P2 incidents with root-cause analysis and implementation of preventive fixes, achieving **99.5% application availability SLA** compliance across critical modules.

SKILLS

Programming Languages – C, C++, Python, Java, SQL.

Software Development & Version Control – Spring Boot, REST APIs, Git, Jenkins CI/CD, Jira, Confluence, code reviews, ASPICE quality standards.

Embedded Systems & Development Tools – microcontroller development, DSP, ARM, Multi-core SoC, emulators, debuggers, hardware profiling, module testing, test specification.

Configuration Management & Testing – CM database management, change control, ECU configuration and testing, test report generation, module test frameworks.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Linux, shell scripting, log analysis.

Monitoring & Observability – Splunk, Dynatrace, application performance monitoring, SLA management, incident response, production support.

Data & Analytics – PostgreSQL, MySQL, Oracle, pandas, NumPy, Power BI, DAX, data modelling.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Embedded ECU Module Testing & Configuration Management Framework (HCL Technologies)

- Architected and implemented an **embedded ECU module testing framework** in C/C++ targeting **ARM Multi-core SoC** and **microcontroller** platforms; designed automated **test specifications** and **test harnesses** to validate module behavior across heterogeneous hardware targets, reducing manual testing overhead by **60%**.
- Integrated **emulators and debuggers** into continuous validation pipeline; established **configuration management database** integration for all test artifacts, **module test reports**, and code changes; implemented **Git-based version control** and **Jenkins CI/CD automation** to orchestrate multi-stage builds and test execution across **ARM, DSP**, and **microcontroller** ECU targets.
- Developed **user specifications** and technical documentation in **Confluence** for ECU configuration workflows; established **code review** processes and **ASPICE-compliant quality gates** for all module commits; organized peer reviews and root-cause analysis sessions, improving first-pass test pass rate from **71% to 94%** within 4 months.
- Led **module testing and generation of module test reports** across 12 embedded subsystems; created automated **ticket generation** workflows in **Jira** for defect triage; implemented and tracked fixes for all assigned tickets with traceability back to requirements, achieving **zero critical module failures** in production deployment across 8 vehicle platforms.

Payment Systems Monitoring & Production Support Dashboard (HCL Technologies)

- Built production monitoring and incident-response dashboard using **Splunk** and **CloudWatch** for enterprise payment processing systems; implemented real-time alerting and **SLA management** workflows for **P1/P2 incident response**, reducing mean time to recovery (MTTR) by **45%** and maintaining **99.5% availability** SLA.
- Authored **user specifications** and runbooks for production support teams; supported team in testing and UAT validation of payment module changes; created **test reports** and regression documentation in **Confluence**, ensuring all changes met regulatory and **QA requirements** before production deployment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
