PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **lead routing automations** and **sales productivity workflows** using **Python**, **SQL**, and **REST API integrations** across enterprise systems at HCL, reducing manual handoffs by **30%** and improving SLA compliance from **85% to 97%**.
- Conducted **root cause analysis** on production incidents using **Splunk**, **CloudWatch**, and **Dynatrace dashboards**; implemented **continuous improvement** monitoring strategies that decreased P1 incident resolution time by **40%** and embedded data-driven KPI tracking across operations teams.
- Designed and optimized **data enrichment pipelines** using **Python (pandas, NumPy)** and **SQL (PostgreSQL, Oracle)** to validate and cleanse transaction data across banking systems; maintained **data integrity** standards across **SWIFT messaging** platforms and **ISO 20022** payment flows.
- Collaborated cross-functionally with Sales, Operations, and Finance teams on **lead enrichment** and **sales-process improvements**; gathered requirements, translated ambiguous business problems into technical specifications, and delivered **automated solutions** that scaled reporting to **500+ daily transactions** with **zero manual intervention**.
- Administered **system integrations** and **change-control workflows** across interconnected enterprise platforms including **ERP modules**, **REST APIs**, and database-level data flows; coordinated UAT cycles and post-implementation triage that ensured **99.5% uptime** during critical financial operations.
- Developed **Power BI dashboards** and **data-modelling frameworks** for executive reporting; performed **root-cause analysis** using statistical methods and built **self-sourced analytics** that identified inefficiencies in inbound lead allocation, driving **15% improvement** in sales-conversion metrics.

SKILLS

RevOps & Technical Ownership – lead routing optimization, sales-productivity automation, systems integration, workflow orchestration, change-control management.

Data Analytics & Problem Solving – SQL, Python (pandas, NumPy), root-cause analysis, KPI measurement, continuous improvement, statistical analysis, A/B testing.

Automation Platforms & Tools – Python scripting, REST API integrations, Jenkins CI/CD, Git, Jira, workflow automation, scheduled reporting, ETL pipeline development.

Business Intelligence & Data Visualization – Power BI (dashboards, DAX, data modelling, Power Query), Tableau, data warehousing, executive reporting, business-data analysis.

Enterprise Systems & Domains – ERP integration, SWIFT messaging (MT/MX), ISO 20022 message flows, payments processing, SEPA, cross-border payments, PSD2, regulatory compliance (GDPR), banking operations, financial services.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, monitoring (Splunk, Dynatrace), production support, incident management.

Cross-Functional Communication – requirements gathering, stakeholder engagement, user training, change-management initiatives, sales/operations/finance alignment, technical translation for non-technical teams.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments Operations Dashboard & Lead Routing Enhancement (HCL Technologies)

- Owned end-to-end **lead routing** and **transaction-flow visibility** system supporting a banking client's payments-operations platform; architected **data enrichment workflows** using **Python** and **SQL** to automatically segment and allocate inbound financing requests based on customer risk profile and payment-volume thresholds.
- Implemented **real-time monitoring dashboards** in **Power BI** tracking **SWIFT MT/MX message flows**, **ISO 20022** compliance, and **SEPA cross-border payment SLAs**; integrated **REST API** feeds from **AWS Lambda** and **CloudWatch** to provide operations teams with **99.2% uptime visibility** and **regulatory audit trails** (GDPR-compliant data logging).
- Collaborated with banking-domain Business Analysts, Finance, and Compliance teams on **lead enrichment** and **process-improvement initiatives**; conducted **root-cause analysis** on payment-routing failures and implemented automated reconciliation workflows that reduced manual intervention by **65%** and improved SLA adherence to **98.5%**.

Revenue Operations Analytics & Automation Framework (HCL Technologies / Ireland Jobs Tracker)

- Designed a **self-sourced analytics framework** combining **Python**, **SQL**, and **Power BI** to extract, enrich, and model sales-pipeline data; implemented **ETL pipelines** using **pandas** and **NumPy** to clean customer data, perform **data-integrity validation**, and auto-feed **Power BI dashboards** with real-time KPI metrics (lead-source ROI, conversion funnels, sales-cycle velocity).
- Built **workflow automations** using **Python scripting**, **REST API integrations**, and **Jenkins CI/CD pipelines** to eliminate manual lead-allocation tasks; orchestrated **prompt engineering** and **API-driven automation** (Claude/Anthropic SDK) to generate tailored content at scale, reducing turnaround time from **4 hours to 8 minutes** per lead.
- Established **continuous improvement** processes by tracking **KPIs** (lead-routing efficiency, time-to-offer, conversion rates) and performing **statistical analysis** to identify inbound-flow inefficiencies; presented findings to cross-functional stakeholders (Sales, Marketing, Operations) and led implementation of **automated solutions** that improved sales-team productivity by **35%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
