PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **enterprise-grade Java Spring Boot applications** delivering scalable, performant, and resilient solutions in production environments supporting **SLA-critical financial services workloads** with **99.9% uptime** across **distributed cloud infrastructure**.
- Architected and implemented **Object-Oriented solutions using Java Spring Boot framework** with **metadata-driven development patterns**, delivering **REST API integrations** across interconnected enterprise business systems including **ERP platforms** and operational backends for **cross-border payments and SEPA transaction processing**.
- Wrote and maintained **comprehensive unit, integration, and system-level tests** across the **CD/CI pipeline using Jenkins**, achieving **85%+ code coverage** and reducing P1/P2 production incidents by **40%** through automated regression testing and **resilience validation**.
- Collaborated in **fast-paced agile environments** delivering enterprise features on tight deadlines through **pair programming, code reviews, and knowledge-sharing sessions**; mentored junior engineers on **OO design principles, testing pyramid best practices, and production-support workflows**.
- Developed **React-based UI components** integrated with **Spring Boot backend services**, delivering user-facing features for enterprise financial dashboards with **real-time data refresh** and **regulatory compliance audit trails** for GDPR and financial reporting.
- Led **integration technology initiatives** connecting **Java microservices via REST APIs and database-level data flows** across **PostgreSQL, MySQL, and Oracle** systems; managed **change-control processes** and **UAT coordination** for payments infrastructure supporting **ISO 20022 message flows, SWIFT MT/MX formats, and tokenization workflows**.

SKILLS

Object-Oriented Languages & Frameworks – Java, Spring Boot, C#, Scala, REST API design and development.

Enterprise Application Development – metadata-driven development, OO design patterns, scalable architectures, resilient systems design, distributed cloud applications.

Testing & Quality Assurance – unit testing, integration testing, system-level testing, test automation, testing pyramid, CD/CI pipeline validation, regression testing, resilience testing.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, CI/CD pipelines, Jenkins, Git, Linux.

Frontend & Modern UI Technologies – React, Angular, responsive design, component-driven development.

Databases & Data Integration – PostgreSQL, MySQL, Oracle, SQL query optimization, schema management, integration technologies, ETL workflows.

Financial Services & Enterprise Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, tokenization, PSD2, Open Banking, GDPR compliance, audit trails, payments processing operations.

EDUCATION AND TRAINING

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Architected and developed **Java Spring Boot microservices** with **metadata-driven configuration** delivering real-time transaction visibility and operational alerting for **SWIFT messaging and ISO 20022 payment flows** supporting a Fortune 500 banking client.
- Implemented **comprehensive unit, integration, and system-level test suites** validating **SEPA instant payments, cross-border transaction routing, and regulatory compliance workflows** with **automated CI/CD validation** ensuring **99.9% production reliability**.
- Designed **React-based UI dashboard components** integrated with **Spring Boot APIs** providing real-time monitoring of **payment message queues, transaction reconciliation, and GDPR audit trail visibility** for operations teams and regulatory stakeholders.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Built end-to-end **metadata-driven application orchestrating AI workflow automation** integrating **Claude API (Anthropic)** with **prompt engineering** to generate tailored resumes at scale using **structured JSON constraint guardrails**.
- Developed **scalable, resilient multi-stage pipeline**: Apify web scrapers → job description ingestion → **Claude-tailored content generation** → **reportlab PDF rendering** → **GitHub Actions CI/CD** → **Vercel deployment**, processing **500+ job descriptions monthly**.
- Implemented **React frontend** with real-time job tracking, **SQL database schema** for persistence, and **REST APIs** for integration; demonstrated hands-on expertise in **modern UI technologies, system integration, and collaborative agile delivery** across cloud platforms.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
