PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and critically assessed **AI-generated outputs** across production enterprise systems at HCL Technologies, identifying inconsistencies, weaknesses, and improvement opportunities in **Java Spring Boot** feature implementations, REST API responses, and **Python** automation scripts with high accuracy and attention to detail.
- Applied **structured evaluation guidelines** and **quality standards** to assess clarity, usability, and user experience of **Power BI** dashboards, **Tableau** visualizations, and business intelligence reports; delivered insightful, nuanced feedback to inform model and system improvements for **20+ stakeholder presentations**.
- Collaborated with cross-functional teams including banking-domain business analysts, operations teams, and regulatory compliance leads to define and refine **quality standards, scoring criteria, and review processes** for SWIFT messaging systems, payment operations workflows, and ERP integrations.
- Maintained high accuracy and consistency across **AI workflow evaluations** using **Claude API** and **prompt engineering** in the Ireland Jobs Tracker project, ensuring reliable and actionable results through structured-JSON validation, constraint guardrails, and end-to-end testing across **500+ generated outputs**.
- Contributed to continuous enhancement of **evaluation workflows and best practices** through **CI/CD pipelines** (GitHub Actions, Jenkins) and **annotation workflows**, supporting the development of training data that enhanced system reliability and performance across production environments.
- Demonstrated exceptional **reading comprehension, critical thinking, and observational skills** while supporting UAT coordination, defect triage, and post-implementation review for enterprise systems; delivered consistent, high-quality evaluations in ambiguous production-support scenarios with **99%+ consistency rating**.

SKILLS

AI & LLM Evaluation – AI output assessment, quality evaluation frameworks, prompt engineering, Claude API, structured feedback, annotation workflows.

Content & Visual Assessment – clarity evaluation, usability analysis, aesthetic judgment, editorial review, visual experience assessment, consistency checking.

Critical Analysis & QA – attention to detail, inconsistency identification, quality standards definition, scoring criteria development, root-cause analysis.

Software & Enterprise Systems – Java Spring Boot, Python, REST APIs, Power BI, Tableau, SQL, AWS, Docker, CI/CD (Jenkins, GitHub Actions).

Domain Knowledge – banking & payments operations, SWIFT messaging (MT/MX), ISO 20022, SEPA, ERP systems, change-control management, regulatory compliance.

Communication & Collaboration – written and verbal communication, cross-functional teamwork, stakeholder management, training material development, workflow documentation.

Data & Analytics – data modelling, ETL pipelines, statistical analysis, business intelligence, Power Query, DAX, hypothesis testing.

EDUCATION AND TRAINING

PROJECTS

AI-Driven Resume Generation & Quality Evaluation System – Ireland Jobs Tracker (Personal Project)

- Engineered end-to-end **AI workflow orchestration** integrating **Claude API** (Anthropic SDK) with **structured-JSON prompt engineering** to generate job-description-tailored resumes at scale, applying rigorous **quality evaluation criteria** and **constraint guardrails** to ensure clarity, accuracy, and usability across **500+ generated outputs**.
- Implemented **multi-stage evaluation framework** with **annotation workflows** to assess AI-generated content for consistency, relevance, and improvement opportunities; iterated on evaluation guidelines based on stakeholder feedback to refine quality standards.
- Developed full-stack pipeline: **Apify scrapers** → job-description ingestion → **Claude-tailored content generation** → **reportlab PDF** generation → **GitHub Actions CI/CD** → **Vercel deployment**; demonstrated **critical thinking** and **observational skills** in identifying and resolving edge cases across diverse content types.

SWIFT Payments Dashboard & AI Output Quality Assurance – HCL Technologies (Banking & Financial Services)

- Reviewed and assessed **AI-generated payment processing outputs**, transaction-flow visualizations, and operational alerting content for quality, clarity, and usability; identified inconsistencies in message formatting (**MT/MX standards**, **ISO 20022** compliance) and delivered nuanced feedback to enhance **SWIFT messaging dashboard** reliability and user experience.
- Applied **structured quality standards** and **evaluation criteria** for payment operations workflows, cross-border payment logic, and SEPA instant-payment features; collaborated with banking-domain business analysts and compliance teams to define and refine assessment guidelines ensuring regulatory and audit-trail integrity.
- Maintained **high accuracy and consistency** across **200+ UAT test cycles** and post-implementation evaluations; demonstrated **attention to detail** and **critical thinking** in ambiguous production-support scenarios, delivering reliable feedback that informed system enhancements and reduced production incidents by **15%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
