PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, deployed, and managed **resilient, scalable infrastructure** across **AWS** (EC2, S3, Lambda, CloudWatch) and containerized environments using **Docker**, supporting enterprise Java/.NET applications serving banking and payments clients with **99.9% uptime SLAs**.
- Implemented and optimized **CI/CD pipelines** using **Jenkins, Git**, and automated deployment workflows that accelerated release cycles by **40%** across development, staging, and production environments while enforcing code review and change-control governance.
- Automated infrastructure provisioning, configuration management, and system administration tasks using **Python scripting, shell scripting**, and **Linux** command-line tools; built automated reporting pipelines and scheduled jobs reducing manual operational overhead by **50%**.
- Implemented comprehensive **monitoring, alerting, and logging solutions** using **Splunk, CloudWatch**, and **Dynatrace**; designed dashboards for system health, performance metrics, and incident visibility enabling rapid P1/P2 incident response and SLA management across distributed systems.
- Enforced **IAM principles, secrets management, and security best practices** across cloud infrastructure; implemented access controls, audit trails, and compliance guardrails for financial-services production environments subject to **GDPR** and regulatory requirements.
- Troubleshoot and resolved infrastructure, deployment, and system integration issues through strong cross-functional collaboration with development teams, operations, and business stakeholders; provided production support and post-go-live triage for interconnected cloud-native and enterprise systems.

SKILLS

Cloud Platforms & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP, Digital Ocean, Infrastructure as Code practices.

Containerization & Orchestration – Docker, Kubernetes, microservices architectures, container deployment strategies.

Infrastructure Automation & Configuration Management – Terraform, Ansible, Python scripting, shell scripting, Linux system administration.

CI/CD & Deployment Pipelines – Jenkins, Git, GitHub Actions, CI/CD pipeline design and optimization, rapid reliable deployments.

Monitoring, Logging & Observability – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch, centralized logging solutions, alerting frameworks.

Security & Access Management – IAM principles, secrets management, GDPR compliance, audit trails, security best practices, access controls.

Systems & Networking – Linux administration, networking fundamentals, troubleshooting, distributed systems, agile delivery methodologies.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise SWIFT Payments Operations Infrastructure (HCL Technologies)

- Architected and maintained **resilient, scalable infrastructure** for a banking client's SWIFT messaging and payments-operations dashboard supporting high-volume transaction flows across **AWS** with redundancy and failover capabilities.
- Implemented **comprehensive monitoring and alerting** using **Splunk** and **CloudWatch** to track payment message processing, SLA compliance, and operational health; designed incident-response dashboards reducing mean-time-to-resolution (MTTR) by 35%.
- Deployed **IAM policies, secrets management, and audit logging** to enforce regulatory compliance (GDPR, financial-services standards) and ensure secure access to production payment systems handling SEPA, cross-border, and ISO 20022 message flows.
- Optimized **CI/CD pipelines** using **Jenkins** and **Git** for rapid, reliable deployments of payment-processing microservices; implemented change-control governance and UAT coordination workflows supporting zero-downtime updates.

Cloud-Native Automation & Orchestration Initiative (Ireland Jobs Tracker AI Project)

- Orchestrated end-to-end **infrastructure automation and cloud-native workflows** integrating third-party APIs (Claude Anthropic SDK, Apify scrapers) with containerized deployment pipelines; built **GitHub Actions** CI workflows and **Vercel** cloud deployment infrastructure.
- Implemented **Infrastructure as Code** principles through configuration-driven automation, JSON-structured prompt engineering, and guardrailed API integration patterns; reduced manual deployment steps by **80%** through fully automated cloud-native orchestration.
- Designed scalable, resilient system architecture combining **Python** backend services, **Docker** containerization, and cloud-deployment strategies; leveraged **GitHub Actions** for automated testing, building, and deployment to **Vercel** supporting multi-environment cloud delivery.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
