PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Python** feature pipelines on **AWS Lambda** and **S3** to power downstream ML scoring, processing approximately **3,500 events/sec** during peak hours and replacing a legacy batch job.
- Acted as the primary technical point of contact for two enterprise customers during their onboarding to an internal ML platform, gathering feature pipeline requirements and translating them into actionable **Python** implementations.
- Engineered a **Java Spring Boot** REST API for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Collaborated with customer engineering teams on post-sales technical engagements, including pair-debugging integration issues for a new customer within their production environment.
- Designed and implemented **mutual-TLS device identity** and certificate rotation for a **5,000-node Linux controller fleet**, integrating with a **NestJS** auth service backed by **PostgreSQL**.
- Wrote production runbooks and internal documentation for customer onboarding that reduced the average time-to-deployment from over 4 weeks to approximately 10 days.

SKILLS

Languages – Python, SQL, Java, R, TypeScript

Frameworks/Libraries – Spring Boot, NestJS, pandas, NumPy, scikit-learn, FastAPI

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle

ML/Data Platforms – MLOps, Feature Pipelines, Feature Store, Data Warehousing

BI/Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

DevOps/Tools – Git, Jenkins, Jira, Splunk, Dynatrace

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Developed a guided onboarding flow for two pilot enterprise customers adopting an internal ML feature store, including SDK examples and debug tooling that compressed time-to-first-feature from ~6 weeks to 9 days.
- Built a **Python CLI** tool to validate customer feature definitions against the platform schema before submission, catching approximately **70%** of schema errors at write time.
- Led two technical workshops for customer data teams, upskilling their engineers on platform integration patterns and best practices for feature pipeline development.

Fraud Detection Model on Transaction Features

- Engineered a **Python** and **SQL** feature pipeline to extract behavioral signals from a transaction log of approximately **1.1M records**.
- Trained a **LightGBM classifier** on extracted features, tuning class weights to address a **1:140** fraud imbalance and reaching approximately **0.91 AUC**.
- Packaged the model behind a **FastAPI** inference endpoint, achieving a p95 latency of approximately **180ms** and implementing basic feature-drift logging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
