PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **event-driven backend infrastructure** using **Python** and **Flask**, processing over 1 million device events daily to enable real-time communication for cloud-connected access control systems.
- Engineered **distributed coordination and reliability** mechanisms for a fleet of 10,000+ Linux-based controllers, reducing device offline incidents by **40%** under adverse network conditions.
- Implemented **device identity, authentication, and security** protocols, integrating short-lived token generation and validation, which strengthened system security and prevented unauthorized access by **99.8%**.
- Automated **device update orchestration and rollout** processes using **CI/CD pipelines** and **shell scripting**, successfully deploying updates to 95% of the device fleet within a 2-hour maintenance window.
- Enhanced **observability, debugging, and production tooling** by integrating **Splunk** and **CloudWatch** logs, reducing average incident resolution time by **30%** for critical platform issues.
- Designed and maintained **backend APIs and platform systems** using **Java Spring Boot**, supporting **real-time networking** capabilities and enabling seamless device-to-cloud communication for over 5,000 connected buildings.

SKILLS

Core Backend – Python, Java Spring Boot, Flask, FastAPI, REST APIs, Node.js, NestJS, Rust

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle

DevOps & Reliability – Jenkins, Git, Splunk, Dynatrace, CI/CD, Production Support, Fleet Management

Data & Analytics – Power BI, Tableau, DAX, R, pandas, NumPy, scikit-learn

Systems & Networking – Real-time Networking, Distributed Systems, Event-Driven Architecture, Authentication, Security

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Device Fleet Management Platform (HCL Technologies)

- Architected a scalable backend platform for managing a distributed fleet of 5,000+ Linux controllers, focusing on **real-time networking** and **device-to-cloud communication**.
- Implemented robust **authentication and security** mechanisms using token-based validation, ensuring secure data transfer and preventing unauthorized access, achieving a **99.95%** security compliance rate.

- Developed **event-driven backend infrastructure** with **Python** and **PostgreSQL**, enabling asynchronous processing of device status updates and command executions, reducing message latency by **25%**.

Automated SWIFT Payments Dashboard (HCL Technologies)

- Supported a critical banking client dashboard for monitoring **SWIFT messaging** and payment operations, enhancing transaction flow visibility for operational teams.
- Developed **Python** scripts for data aggregation and reporting, improving the accuracy of SLA adherence tracking by **15%**.
- Contributed to production support and incident response for financial services environments, ensuring high availability and adherence to strict operational standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
