PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained game features across multiple titles by collaborating with multi-disciplinary engineering teams, focusing on C++ and Unreal Engine integration.
- Wrote clean, efficient, and maintainable C++ code for AAA titles, adhering to established coding standards and best practices within a fast-paced development cycle.
- Participated in instructor-led group projects and technical workshops, receiving guided feedback on game development fundamentals and essential soft skills.
- Troubleshot, debugged, and optimized systems across diverse engineering platforms and game engines, ensuring stable and performant game experiences.
- Adapted quickly to varied studio workflows and version control tools, including **Perforce**, to meet demanding game release timelines.
- Containerized application components using **Docker** and deployed them onto **AWS EC2** instances, streamlining the development and testing process.
- Managed code reviews and collaborated on technical estimations for sprint planning, contributing to efficient team velocity and project delivery.

SKILLS

Languages – C++, Python, Java, SQL

Engines & Frameworks – Unreal Engine

Tools & Platforms – Perforce, Git, Docker, AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum

Other – Algorithms, Data Structures, Software Design Patterns, Debugging, Problem-Solving

PROJECTS

Unreal Engine Game Feature Development

- Engineered core gameplay mechanics in **C++** within the **Unreal Engine** for a new action-RPG title, focusing on player input and combat systems.
- Implemented asynchronous loading systems using **Unreal Engine**'s C++ framework to improve in-game scene transitions and reduce load times by approximately **18%**.
- Collaborated with design and art teams to integrate new character abilities, ensuring seamless alignment between technical implementation and creative vision.

Automated Build and Deployment Pipeline

- Constructed a CI/CD pipeline using **Jenkins** and **Perforce** to automate the build and testing process for game client updates, reducing manual deployment time by **45%**.
- Containerized build agents with **Docker**, ensuring consistent build environments across development and staging servers on **AWS**.
- Integrated automated testing suites into the pipeline, catching approximately **20%** more regressions before release compared to previous manual checks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
