PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for backend services, handling over 5,000 requests per minute for core business functions.
- Integrated a third-party payment gateway into an enterprise-level financial operations dashboard, ensuring secure and reliable transaction processing.
- Designed and implemented database schemas and complex SQL queries across PostgreSQL and Oracle databases to support new feature development and data reporting.
- Automated report generation and data ingestion processes using Python scripts, reducing manual effort by approximately 15 hours per week for the operations team.
- Managed incident response and production support for critical enterprise applications, resolving P1/P2 issues within defined SLA targets and performing root cause analysis.
- Containerized several Java microservices using Docker and deployed them to an AWS EC2 environment, improving deployment consistency and reducing setup time.
- Collaborated with cross-functional teams including business analysts and operations to gather requirements, support UAT, and triage post-implementation issues for system updates.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Payments Operations Dashboard Enhancement

- Enhanced a financial services operations dashboard by developing new Java Spring Boot modules to monitor transaction flows and identify an average of 280 stuck payment messages daily.
- Automated data retrieval and validation for operational reporting using Python and SQL, reducing the time to generate weekly status reports from 6 hours to 1.5 hours.
- Implemented REST APIs to integrate the dashboard with upstream and downstream enterprise systems, facilitating real-time data exchange for reconciliation workflows.

MSc Applied Data Analytics Project: Customer Churn Prediction

- Developed a predictive model using scikit-learn (Logistic Regression) on a dataset of 75,000 customer records to identify factors contributing to churn, achieving ~0.78 AUC.
- Engineered features in Python using pandas, including customer engagement metrics and service usage patterns, to improve model accuracy.
- Visualized key insights and model performance metrics using Power BI dashboards for presentation to academic stakeholders, highlighting drivers of customer attrition.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
