HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented Java Spring Boot REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Developed and maintained a payments operations dashboard for a financial-services client, focusing on transaction monitoring and operational alerting for failed payments.
- Automated data extraction and transformation tasks using Python scripting, developing ETL pipelines that reduced manual processing time by approximately **40%**.
- Managed production incidents for enterprise applications, performing root cause analysis and SLA adherence using **Splunk** and **Dynatrace** for monitoring.
- Collaborated with client operations teams to gather requirements for system enhancements, supporting UAT and post-implementation triage for enterprise systems.
- Performed database operations including ad-hoc queries, data validation, and schema modifications across **PostgreSQL**, **MySQL**, and **Oracle** databases.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations via **Jenkins** CI/CD pipelines.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Linux

PROJECTS

Enterprise Java Application Monitoring Dashboard

- Developed a Java Spring Boot application to aggregate and visualize operational metrics from multiple enterprise systems, including transaction volumes and error rates.
- Integrated with monitoring tools like **Splunk** and **Dynatrace** to ingest real-time performance data, enabling proactive identification of potential issues.
- Designed a user-friendly interface with key performance indicators and alerting mechanisms, aiding operations teams in maintaining system stability and meeting SLAs.

Python-Based Data Pipeline for Financial Reporting

- Engineered a Python data pipeline to automate the extraction, transformation, and loading (ETL) of financial transaction data from disparate sources into a central data warehouse.
- Implemented data validation checks and reconciliation workflows within the pipeline to ensure data integrity, reducing reporting errors by approximately **15%**.
- Scheduled and monitored pipeline execution using cron jobs on Linux, delivering timely reports to business analysts and stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
