PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Collected and analyzed diverse datasets to support the development of transport strategies and plans for regional infrastructure projects.
- Prepared comprehensive transport assessments for various developments, detailing impact analysis and mitigation measures for clients.
- Assisted in the preparation of technical reports and presentations for client meetings, effectively communicating complex data and findings.
- Participated in workshops and stakeholder meetings, contributing technical input and capturing feedback for project refinement.
- Developed and applied basic transport models to evaluate scheme performance and support business case development for infrastructure initiatives.
- Managed change control processes for system configurations and coordinated user acceptance testing for enterprise business systems.
- Authored detailed runbooks and documentation for production support, streamlining incident response for critical enterprise applications.

SKILLS

Data Analysis – Data Collection, Transport Modelling, Scheme Appraisal, Reporting, Presentation Preparation

Transport Planning – Transport Strategy Development, Development Planning, Business Case Development, Transport Assessments

Software & Tools – Microsoft Office Suite, Word, Excel, PowerPoint, Jira, Confluence, Git

Programming & Scripting – Python, SQL, Java, Spring Boot

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Linux

PROJECTS

Integrated Transport Strategy for Urban Development (HCL Technologies)

- Gathered and analyzed transportation data from multiple sources including traffic counts and census information to inform strategy development.
- Developed preliminary transport models using Python to assess the impact of proposed urban development schemes on existing infrastructure.
- Prepared a detailed report outlining recommended transport strategies and mitigation plans for a large-scale mixed-use development project.

Production Support Automation for Enterprise Systems (HCL Technologies)

- Automated log analysis and alert correlation using Python scripts, reducing manual monitoring effort by approximately 40% for critical systems.
- Developed and deployed REST APIs using Java Spring Boot to facilitate data exchange between disparate enterprise applications, improving system interoperability.
- Managed incident response and root cause analysis for P1/P2 incidents, ensuring adherence to strict service level agreements for financial services operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
