PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Executed electrical installations for **solar PV systems**, including mounting and wiring panels, inverters, and batteries, adhering to design specifications and local electrical codes across ~45 residential installations.
- Safely connected **solar systems** to building electrical networks and the grid, installing and commissioning switchgear, circuit breakers, and generation meters.
- Conducted thorough system testing and commissioning, verifying proper voltages and performance using multimeters and clamp meters, resolving wiring errors to ensure optimal function prior to handover.
- Adhered rigorously to all electrical safety standards and protocols, including **PPE** usage and lockout/tagout procedures, ensuring compliance with national electrical regulations for grid connection verification.
- Delivered neat and organized electrical work, labeling circuits, tidying conduits, and documenting on-site modifications accurately for ~30 completed projects.
- Collaborated closely with broader installation crews, including roof installers and site supervisors, coordinating tasks to ensure projects remained on schedule and providing guidance to 2 junior technicians.
- Participated in training sessions on new solar products and installation techniques, actively contributing suggestions for improving installation practices based on field experience.

SKILLS

Solar/Renewables – Solar PV Installation, Solar System Integration, PV System Components, Renewable Energy

Electrical Work – Electrical Installation, Wiring Methods, Switchgear, Circuit Breakers, Generation Meters, Electrical Codes, Electrical Diagrams, Schematics

Safety & Compliance – Electrical Safety Standards, PPE, Lockout/Tagout, National Electrical Regulations, Grid Connection Compliance, Safe Pass, Working at Heights, First Aid, Manual Handling

Tools & Testing – Multimeters, Clamp Meters, Hand Tools, Power Tools, Testing Instruments

Project Management – Site Supervisors, Team Collaboration, On-site Modifications, Documentation

Customer Interaction – Client Interaction, Basic System Operations Explanation

PROJECTS

Residential Solar PV System Installation (HCL Technologies)

- Managed the end-to-end electrical installation of **solar PV systems** on residential properties, including panel mounting, inverter and battery wiring, and grid integration.
- Ensured strict adherence to all relevant **electrical codes and safety standards**, performing comprehensive system testing and commissioning to verify performance and resolve faults.
- Documented all installations, including any on-site modifications, and provided basic system operation explanations to homeowners upon project completion.

Commercial Solar System Commissioning (MSc Applied Project)

- Performed diagnostic testing and commissioning on a small-scale commercial **solar PV installation**, focusing on verifying energy generation output and safety compliance.
- Troubleshot and resolved wiring discrepancies in the **inverter and switchgear connections**, ensuring seamless integration with the existing building electrical network.
- Generated a final report detailing system performance metrics and compliance with **SEAI guidelines** for renewable energy installations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
