HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed **P1/P2 incidents** for enterprise Java/.NET applications, coordinating response across multiple teams to restore service within **defined SLAs**.
- Developed **Python scripts** to automate data extraction and transformation tasks, reducing manual processing time for scheduled reports by approximately **40%**.
- Executed **SQL queries** across PostgreSQL and Oracle databases for data validation and ad-hoc reporting, supporting operational analysis for a financial-services client.
- Built and enhanced **incident detection and mitigation automation tools** using Python, directly reducing the time to detect critical system impairments.
- Led the technical response for **large-scale customer-impacting events**, triaging impact, identifying root causes, and orchestrating mitigation actions with service teams in real-time.
- Authored **Cause of Event (COE) documents** and event deep-dives, identifying systemic improvement opportunities and driving action items to enhance platform reliability.
- Containerized Java Spring Boot services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and enabling faster rollbacks.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum, Incident Response

PROJECTS

Real-time Transaction Monitoring Dashboard

- Developed a **Java Spring Boot** application to process and display real-time transaction data from a financial-services pipeline.
- Integrated with **PostgreSQL** to store and retrieve transaction statuses, enabling quick lookups for operational teams during incident triage.
- Designed RESTful APIs for data ingestion and querying, supporting the display of key operational metrics on an internal dashboard for monitoring payment flows.

Automated Production Health Check System

- Engineered a **Python**-based system to perform automated health checks on production servers, identifying potential issues before they impacted customers.
- Integrated with **AWS CloudWatch** APIs to collect system metrics and trigger alerts, reducing manual system monitoring effort by approximately **30%**.
- Developed shell scripts for log analysis and anomaly detection, streamlining the root cause identification process for common system errors.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
