HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and enhanced AWS-based telecommunications infrastructure, focusing on reliability and scaling for global voice and video communications solutions.
- Developed self-healing capabilities for internal telephony systems, reducing critical incidents by **18%** through proactive monitoring and automated remediation.
- Built self-service tools enabling Amazonians to manage their telecom resources, improving operational efficiency and reducing support ticket volume by **12%**.
- Designed and implemented next-generation telephony platform features using **Java** and **Spring Boot**, adhering to mature CI/CD processes on AWS.
- Collaborated with junior engineers on code reviews and technical design discussions, contributing to skill development within the team.
- Managed and supported systems engineering fundamentals including **Linux** operating systems, networking protocols, and storage systems.
- Containerized telecommunications services using **Docker** and deployed them to an **AWS** environment, ensuring scalable and resilient operations.

SKILLS

Core Technologies – Java, Python, Linux, AWS, Docker, Git, Jenkins, SQL, REST APIs

Telephony & Networking – Voice Communications, Video Communications, Telecommunications Infrastructure, Networking Fundamentals

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), CI/CD, DevOps Patterns, Containerization

Programming Languages – Java, Python, PowerShell, Ruby

Systems Engineering – Operating Systems, Storage Systems, Systems Architecture, Reliability, Scaling

Methodologies – Agile, Scrum

PROJECTS

Next-Generation Telephony Platform Development

- Designed and built core components for a new internal telephony platform using **Java** and **Spring Boot**, focusing on high availability.
- Implemented self-healing mechanisms and automated recovery processes for critical telephony services, improving system resilience.
- Integrated with AWS services for scalable deployment and monitoring, ensuring the platform could handle dynamic load.

Internal Communications System Enhancement

- Developed Python scripts to automate the provisioning and management of user telecom resources, simplifying self-service operations.
- Analyzed system logs and performance metrics using **Splunk** to identify bottlenecks and areas for improvement in communication flows.
- Contributed to the design of APIs for managing voice and video communication endpoints, facilitating integration with enterprise systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
