HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for core backend functionalities, adhering to **RESTful API** principles and managing data persistence with **Hibernate**.
- Implemented **JPA** entities and queries to interact with relational databases, ensuring data integrity and optimizing object-relational mapping for complex financial transactions.
- Authored **JUnit** and **Mockito** test suites for Java components, achieving over **85% code coverage** and ensuring system stability during iterative development cycles.
- Contributed to the operational enhancement of the **European Sovereign Cloud (ESC)** by performing root cause analysis on deployment failures and implementing fixes for critical bugs.
- Participated in **sprint planning** and technical estimation sessions, collaborating with team leads to define project scope and delivery timelines for new service features.
- Containerized backend applications using **Docker** and managed deployments within an **AWS Elastic Kubernetes Service (EKS)** environment, configuring basic resource limits and network policies.
- Engineered **Python** scripts to automate data ingestion and ETL processes for operational reporting, reducing manual data preparation time by approximately **40%**.

SKILLS

Programming Languages – Java, Python, SQL, Bash

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git, Linux

Tools & Monitoring – Splunk, Dynatrace, Jira, Confluence

PROJECTS

Enterprise Java Service Modernization (HCL Technologies)

- Refactored legacy Java services into a modular **Spring Boot** application, implementing **RESTful APIs** for inter-service communication and enhancing overall system maintainability.
- Integrated **Hibernate** for data access layer operations, managing database schema migrations and optimizing query performance for a PostgreSQL backend, resulting in a **20% reduction** in average response times.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, ensuring the reliability of new API endpoints and data processing logic before production deployment.

AWS ESC Operations Automation Framework (HCL Technologies)

- Developed **Python** scripts to automate routine operational tasks within the **AWS** environment, including log aggregation from **CloudWatch** and resource status checks on **EC2** instances.
- Built **Jenkins** pipelines to orchestrate the execution of automation scripts and manage deployment configurations for containerized applications on **EKS**.
- Implemented shell scripts for **Linux** server health monitoring and log analysis, reducing manual investigation time for common operational alerts by approximately **35%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
