PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Gathered and documented business requirements from multiple stakeholders for the development and implementation of analytics platform capabilities, translating needs into clear user stories and acceptance criteria.
- Analysed and mapped end-to-end business process flows for enterprise applications, identifying and proposing specific optimisation and automation opportunities to enhance operational efficiency.
- Supported and coordinated testing activities across project phases, including unit testing, integration testing, and user acceptance testing (UAT) to ensure product quality.
- Managed change control processes for system configuration updates, coordinating user acceptance testing and post-go-live support for interconnected enterprise systems.
- Developed Python scripts to automate data extraction and transformation tasks for scheduled reporting, reducing manual effort by approximately 40% for the operations team.
- Designed and implemented REST APIs in Java Spring Boot for cross-service data exchange, incorporating request validation and circuit-breaker patterns to improve system resilience.
- Containerised Java Spring Boot applications using **Docker** and deployed them to an **AWS EC2** environment, managing configurations through **Jenkins** pipelines for consistent delivery.

SKILLS

Business Analysis – Requirements Gathering, Process Mapping, User Stories, Acceptance Criteria, Use Cases, Stakeholder Management, UAT Coordination

Core Technologies – Java, Spring Boot, Python, SQL, REST APIs, Docker, Linux

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query, Data Modelling

Enterprise Systems – ERP Integration, Change Management, Splunk, Dynatrace, Jira, Confluence

PROJECTS

Analytics Platform Requirements Definition (HCL Technologies)

- Collaborated with product owners and business partners to gather and define detailed requirements for new analytics platform features, translating high-level needs into actionable user stories and technical specifications.
- Developed comprehensive process maps and use case documentation for the client's core financial operations dashboard, highlighting areas for workflow optimisation and automation.
- Coordinated and supported user acceptance testing (UAT) cycles with business stakeholders, ensuring all documented requirements were met prior to deployment.

Automated Data Reporting Pipeline (HCL Technologies)

- Engineered a Python-based data pipeline to extract, transform, and load data from PostgreSQL and Oracle databases into a central reporting repository, supporting daily operational summaries.
- Implemented automated data validation checks within the pipeline to ensure data integrity, reducing data discrepancy issues reported by the operations team by over 30%.
- Developed scheduled reporting jobs using cron and shell scripting on Linux to deliver key performance indicators to business analysts via email attachments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
