HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered a **Java Spring Boot** microservice to process and validate incoming transaction data, handling approximately **1,500 events per second** during peak hours.
- Developed and maintained **Hibernate** entities and JPA query methods for efficient data persistence and retrieval from a large-scale relational database.
- Authored comprehensive **JUnit** test suites and implemented mocking strategies with **Mockito**, achieving over **85% code coverage** for core Java application modules.
- Contributed to the planning and estimation of technical tasks within an Agile/Scrum framework, participating in daily stand-ups, sprint reviews, and retrospectives.
- Designed and implemented a RESTful API for cross-system data exchange, integrating with enterprise business systems and ensuring adherence to API design best practices.
- Managed and enhanced CI/CD pipelines using **Jenkins** and Git, automating build, test, and deployment processes for Java applications.
- Deployed containerized Java applications to **AWS EC2** instances, configuring basic resource limits and monitoring key performance indicators via **CloudWatch**.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Linux

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

PROJECTS

Java REST API for Financial Operations

- Developed a **Java Spring Boot** application to expose endpoints for querying and updating operational data within a financial services dashboard.
- Integrated with **PostgreSQL** to manage and retrieve transaction records, implementing efficient data access patterns using **Hibernate**.
- Wrote unit and integration tests using **JUnit** and **Mockito** to ensure API stability and data integrity for core financial workflows.

Python ETL Pipeline for Operational Reporting

- Engineered a **Python** script to extract, transform, and load data from multiple enterprise systems into a centralized data warehouse for reporting purposes.
- Automated report generation using **pandas**, scheduling daily execution via cron jobs on a **Linux** server, reducing manual reporting effort by **~15 hours per week**.
- Implemented data validation checks and error handling within the pipeline to ensure the accuracy and completeness of the final datasets.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
