HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production incidents for enterprise applications, responding to P1/P2 alerts and performing root cause analysis using **Splunk** and **Dynatrace** to restore service within SLA targets.
- Developed Python scripts to automate data extraction and transformation tasks, building ETL pipelines that reduced manual processing time by approximately **40%** for weekly operational reports.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, integrating with existing enterprise systems and ensuring **JPA**-based data persistence to **PostgreSQL**.
- Refactored relational database queries and implemented strategic indexing across **PostgreSQL** and **Oracle** databases, improving analytical report execution times by an average of **34%**.
- Containerised multiple microservices using **Docker** and deployed them to a managed **AWS EKS** cluster, configuring basic resource limits and health checks for predictable performance.
- Collaborated with cross-functional teams to define requirements and coordinate User Acceptance Testing (UAT) for system configuration changes within enterprise business platforms.
- Authored comprehensive production runbooks and troubleshooting guides that reduced average incident resolution time by **15%** for common operational issues.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, JPA, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Java Enterprise Application Monitoring Dashboard

- Developed a **Java Spring Boot** application to aggregate and visualize operational metrics from distributed enterprise systems, providing real-time status updates.
- Integrated with **Splunk** and **Dynatrace** APIs to ingest log data and performance metrics, enabling proactive identification of system anomalies.
- Designed and implemented a **PostgreSQL** data model to store historical performance data, supporting trend analysis and capacity planning for critical services.

Python-based Financial Transaction Data Pipeline

- Engineered a **Python** data pipeline using **pandas** to process and transform large volumes of financial transaction data from various sources.
- Implemented data validation and cleansing routines to ensure data integrity, reducing downstream processing errors by approximately **22%**.
- Built scheduled reporting jobs that generated summary statistics and operational insights for business stakeholders, delivered via automated email distribution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
