PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented structural element designs in **steel** and **reinforced concrete**, adhering to project specifications and safety standards.
- Performed structural analysis using **GSA** software for building components, ensuring compliance with engineering codes and client requirements.
- Collaborated with senior engineers to prepare detailed mark-ups for structural drawings, facilitating the production of construction documents using **Revit**.
- Contributed to site visits and structural investigations, documenting findings and providing input for technical reports on existing building conditions.
- Participated in client and consultant meetings, effectively communicating technical information and project updates to diverse audiences.
- Developed Python scripts to automate data extraction from engineering reports, reducing manual data entry effort by approximately **30%**.
- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring adherence to service level agreements within a **Linux** environment.

SKILLS

Structural Analysis Software – GSA, Tekla Structural Designer

Design Software – Revit, AutoCAD

Materials – Reinforced Concrete, Steel, Timber, Masonry

Engineering Principles – Structural Analysis, Design, Site Investigations

Programming & Scripting – Python, Shell Scripting

Cloud & DevOps – AWS, Docker, Jenkins, Git

PROJECTS

Structural Analysis of Commercial Building Frame

- Conducted detailed structural analysis on a multi-story commercial building frame using **GSA**, assessing load-bearing capacities for steel and concrete elements.
- Prepared comprehensive design mark-ups for structural technicians to translate into **Revit** models, detailing beam, column, and joint specifications.
- Generated technical reports summarizing analysis results and design recommendations, including considerations for seismic and wind loads across the structure.

Automated Data Extraction for Site Investigations

- Developed Python scripts to parse and extract key data points from unstructured site investigation reports, standardizing information for easier analysis.
- Integrated data extraction with basic data validation checks, improving the accuracy of input data for subsequent structural assessments by an estimated **15%**.
- Assisted in the preparation of site visit reports by consolidating extracted data and visual aids, streamlining the reporting process for the engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
