HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed and triaged disclosed **cyber security exposures** and vulnerabilities from multiple workstreams, supporting prioritization of remediation actions.
- Researched and evaluated **threat scenarios** and mitigating controls, correlating findings with asset enumeration data to assess exploitability.
- Created **SQL and Python scripts** within enterprise toolsets to query datasets, supporting Attack Surface Review and mapping the bank's network endpoints.
- Developed and maintained **visualizations and reports in Power BI** that support operational teams and cyber leadership across Information Security.
- Performed hands-on analysis of large-scale datasets to correlate, map, and measure the overall vulnerability attack surface using **Python and SQL**.
- Authored clear written analysis and delivered live discussions, including executive-level summaries, communicating findings on the bank's **attack surface and exposure risk**.
- Containerized applications using **Docker** and deployed to cloud environments, ensuring efficient resource utilization and scalable operations.

SKILLS

Security Analysis – Exposure Analysis, Attack Surface Research, Vulnerability Management, Threat Intelligence, Risk Assessment.

Scripting & Automation – Python, SQL, ETL, Data Ingestion, Data Transformation, Data Validation.

Data Visualization – Power BI, MS-Reporting Services (SSRS), SSIS.

Tools & Platforms – Qualys, Tanium, BladeLogic, AWS, Linux, Git, Jenkins, Jira, Confluence.

Networking & Architecture – Network Architecture, Data Network Topography, Endpoint Management.

PROJECTS

Enterprise Asset Discovery and Vulnerability Mapping

- Developed Python scripts to automate data ingestion from multiple asset discovery tools, creating a unified view of network endpoints.
- Constructed complex SQL queries against a central data warehouse to correlate asset inventory with disclosed vulnerability data.
- Generated Power BI reports to visualize the bank's attack surface, highlighting critical exposure points for risk management teams.

Automated Security Control Validation

- Engineered Python-based automation to validate the implementation status of security controls across cloud and on-premises assets.
- Wrote shell scripts for log analysis on Linux systems to confirm adherence to security hardening standards, reducing manual checks by 40%.
- Integrated findings into a centralized dashboard, providing actionable insights for the cybersecurity operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
