HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise applications, focusing on robust error handling and asynchronous processing.
- Implemented data ingestion and transformation pipelines using **Python** and **pandas** for a financial-services client, processing approximately 15,000 records daily for operational reporting.
- Managed production incidents and implemented root cause analysis for critical enterprise systems, adhering to strict SLAs and ensuring system stability using **Splunk** and **Dynatrace**.
- Designed and implemented database schema changes and optimized complex **SQL** queries across **PostgreSQL** and **Oracle** databases to support new feature development.
- Containerized existing Java applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing manual configuration overhead.
- Collaborated with cross-functional teams to define requirements, conduct UAT, and provide post-go-live support for enterprise business systems integrations.
- Configured and maintained **Jenkins** CI/CD pipelines for automated build, test, and deployment processes, reducing deployment times by an average of **40%**.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools – Splunk, Dynatrace, Jira, Confluence

PROJECTS

Enterprise Application Monitoring and Alerting System

- Developed a centralized Java Spring Boot application to aggregate logs and metrics from various enterprise systems into a unified dashboard.
- Integrated **Splunk** and **Dynatrace** APIs to ingest real-time performance data, enabling proactive identification of potential P1/P2 incidents for a financial-services client.
- Implemented custom alerting rules based on defined thresholds and anomaly detection, reducing critical incident detection time by approximately **30%**.

Automated Data Reconciliation Pipeline

- Engineered a **Python**-based ETL pipeline to automate the reconciliation of transaction data between two disparate enterprise systems.
- Wrote complex **SQL** queries against **PostgreSQL** to extract and validate data, ensuring accuracy and completeness for financial reporting, processing over 10,000 transactions daily.
- Scheduled and monitored pipeline execution using cron jobs on **Linux**, delivering daily reconciliation reports to operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
