# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and deployed **OpenStack private cloud solutions** for data center infrastructure, focusing on compute, storage, and network resource provisioning.
- Authored and maintained **Terraform scripts** to automate the deployment and configuration of cloud infrastructure resources.
- Developed **Python scripts** for automating cloud operations, including routine maintenance tasks and complex workflow orchestration.
- Monitored and optimized **OpenStack environment performance** and reliability, identifying and resolving bottlenecks to ensure stability.
- Troubleshot complex platform issues across compute, storage, and networking layers, driving continuous improvements in system stability and user experience.
- Integrated **AI-assisted tools** into the development workflow to enhance code quality and accelerate the engineering process.
- Managed production environments using **Splunk** and **Dynatrace** for monitoring and SLA adherence, responding to P1/P2 incidents.

## SKILLS

**Cloud Platform** – OpenStack, Nova, Neutron, Cinder, Keystone, Glance, AWS

**Automation & Scripting** – Python, Terraform, Shell Scripting

**CI/CD & Orchestration** – Jenkins, Kubernetes, Docker

**Operating Systems & Networking** – Linux, Data Center Networking, BGP, VLAN, VXLAN

**Monitoring & Observability** – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch

**Development Tools** – Git, Jira, Confluence

## PROJECTS

### OpenStack Cloud Infrastructure Automation

- Automated the provisioning and management of **OpenStack compute and storage resources** using Terraform, reducing deployment time by 40%.
- Developed **Python automation scripts** to streamline daily operational tasks, such as health checks and log aggregation for the OpenStack environment.
- Implemented robust monitoring and alerting using **Prometheus and Grafana** to track key performance indicators and ensure high availability of cloud services.

### Python-based Cloud Operations Tooling

- Built a suite of **Python scripts** to automate cloud resource cleanup and cost optimization reporting, identifying potential savings of 15% on underutilized EC2 instances.
- Integrated custom Python tooling with **Jenkins pipelines** to automate build, test, and deployment cycles for cloud-native applications.
- Containerized operational tooling with **Docker** for consistent execution across development and production environments.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
