PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored production environments and enterprise data platforms for a managed services client, ensuring operational availability of scheduled data pipelines and reporting solutions.
- Investigated and diagnosed production alerts and job failures, performing first-line technical troubleshooting and restarting failed processes according to documented operational procedures.
- Applied approved operational fixes and configuration changes within the scope of managed service agreements, ensuring adherence to client-specific guidelines.
- Escalated complex technical issues to senior engineering teams, compiling detailed diagnostic information to facilitate timely and accurate resolutions.
- Managed and updated support tickets within a **HubSpot** ticketing system, accurately recording incident details and tracking progression through to resolution.
- Maintained clear and timely communication with clients regarding the status and progress of ongoing support issues, including participation in operational meetings.
- Authored and updated **operational documentation** and knowledge base articles to support effective service delivery and knowledge sharing within the support team.

SKILLS

Support & Operations – IT support, Application support, Production support, Managed services, Incident management, SLA management, Root cause analysis, On-call rotation, Runbooks, Knowledge base management

Data Platforms & Tools – Enterprise data platforms, Data pipelines, Batch processing, Scheduling tools, Operational monitoring, Power BI, Tableau, SQL, Relational databases

Cloud & Infrastructure – Cloud-based data solutions, AWS (EC2, S3, Lambda, CloudWatch), Linux, Shell scripting

Development & Scripting – Java, Spring Boot, Python, REST APIs, SQL (PostgreSQL, MySQL, Oracle)

Ticketing & Collaboration – HubSpot, Jira, Confluence, Agile, Scrum, Change management, Git

PROJECTS

Enterprise Data Platform Monitoring and Alerting System

- Developed and implemented a Python-based monitoring system for enterprise data platforms, integrating with **AWS CloudWatch** and **Splunk** to ingest logs and metrics.
- Configured automated alerting rules within the system to detect job failures and performance anomalies across scheduled data pipelines, reducing manual oversight by **40%**.
- Created a comprehensive set of **runbooks** and operational documentation for the monitoring system, detailing troubleshooting steps for common incident types.

Automated ETL Process Improvement

- Refactored an existing Python ETL script to improve efficiency in data processing for a financial services dashboard, reducing execution time by **18%**.
- Implemented robust error handling and logging mechanisms using **Python**, ensuring data integrity and providing detailed audit trails for daily transaction data processing.
- Collaborated with business analysts to gather requirements for enhanced data reconciliation workflows, translating them into technical specifications for the ETL process.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
