HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed **Python scripts** to automate remote diagnostic routines, reducing average issue diagnosis time for common desktop problems by **18%**.
- Implemented **monitoring and alerting** mechanisms for enterprise desktop environments using **Splunk**, proactively identifying and resolving an average of **30** critical connectivity issues per quarter before user impact.
- Configured and maintained **remote access infrastructure**, including client agents and support consoles, optimizing security policies to align with organizational standards.
- Troubleshot complex desktop issues across operating systems, networks, and application stacks by analyzing logs and performance data, delivering clear root cause findings for **P1 incidents**.
- Collaborated with service desk and infrastructure teams to refine incident handling workflows and improve escalation paths, contributing to a **15%** reduction in average ticket resolution time.
- Created and maintained technical documentation for remote support procedures and standard configurations, enabling faster onboarding of **junior support staff**.
- Containerized remote support tools using **Docker** and managed deployments on **AWS EC2** instances, improving deployment consistency and rollback capabilities.

SKILLS

Remote Support Technologies – Remote desktop support tools, Remote access tools, Ticketing platforms, Endpoint management, Operating system configuration

Scripting & Automation – Python, Shell scripting

Monitoring & Observability – Splunk, CloudWatch, Dynatrace

Cloud & Containerization – AWS (EC2, S3, Lambda), Docker

Networking & Security – Networking fundamentals, System security practices, Access control, Data protection

Development Practices – CI/CD, Git, Code reviews, Agile methodologies

PROJECTS

Enterprise Desktop Support Automation Suite

- Developed a suite of **Python** scripts to automate common remote desktop support tasks, including system diagnostics, software deployment checks, and network connectivity tests.
- Integrated scripts with a **ticketing system** to automatically log findings and suggest resolutions, reducing manual data entry for support engineers by approximately **20%**.
- Created comprehensive user guides and runbooks for the automation suite, facilitating adoption by the wider IT support team.

Proactive Desktop Health Monitoring System

- Engineered a monitoring solution using **Splunk** to collect and analyze logs from enterprise desktop endpoints, focusing on application performance and network stability.
- Configured alerts for critical events such as application crashes, high CPU usage, and network timeouts, enabling proactive intervention and reducing user-reported downtime.
- Collaborated with business stakeholders in the insurance domain to understand critical application workflows and tailor monitoring parameters to specific operational needs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
