PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to establishing and monitoring **critical parameters** for **clean utility systems**, ensuring processes remained in control within a biotech manufacturing environment.
- Supported troubleshooting of **unit operations** and **equipment failures** under guidance, documenting events and assisting in resolution through **formal problem-solving techniques**.
- Participated in safety-related activities, including **hazard reviews** and **pre-start-up safety reviews**, to build safety awareness and contribute to ongoing improvement.
- Assisted in evaluating activities for their impact on the **qualified state** of equipment and learned to apply appropriate **business processes**, such as change control.
- Gained exposure to **system/component classification** and maintenance strategy for equipment, supporting the implementation of corrections and corrective actions.
- Learned to contribute to the **safe design** and operation of equipment, actively participating in safety audits to drive ongoing improvement.
- Developed a foundational understanding of **clean system unit operations** and equipment maintenance, working closely with experienced engineers in an assigned area.

SKILLS

Domain Knowledge – Clean utility systems, Grey systems, Biotech manufacturing, Unit operations, Equipment reliability, Process control

Engineering Principles – Safety mindset, Root Cause Analysis, Change control, IQ/OQ/PQ, Commissioning, Hazard reviews, Periodic Reviews

Software & Tools – Jira, Confluence, Splunk, Dynatrace, CloudWatch, Jenkins, Git, Linux Shell Scripting

Programming Languages – Java, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda)

Methodologies – Agile, Scrum

PROJECTS

Clean Utility Systems Monitoring Dashboard (HCL Technologies)

- Developed a **Python**-based dashboard to monitor **clean utility systems**, aggregating data from various sensors to track critical parameters.
- Implemented automated alerts for deviations in system performance and potential equipment failures, reducing manual oversight by approximately **30%**.
- Integrated with **Splunk** for log analysis and anomaly detection within the utility systems, providing historical data for troubleshooting.

Automated Equipment Maintenance Scheduler (HCL Technologies)

- Engineered a **Python** script to automate the scheduling of preventative maintenance tasks for critical equipment based on usage logs and predefined intervals.
- Designed and implemented a notification system using **AWS Lambda** to alert operations teams about upcoming maintenance, improving adherence to schedules by **20%**.
- Contributed to a change management process for equipment configuration updates, ensuring proper documentation and impact assessment before deployment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
