## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Acted as a primary liaison for business stakeholders, leading discovery sessions to translate complex retail challenges into actionable data use cases and requirements for the analytics team.
- Converted detailed business needs for operational reporting into technical specifications, including source-to-target mappings and transformation logic for data engineers.
- Defined and maintained critical business metric and KPI definitions, ensuring consistent understanding and adoption across Finance, Commercial, and Operations teams.
- Partnered with BI and analytics teams to validate that dashboards and data products, including a new **sales performance dashboard**, accurately met business objectives.
- Supported User Acceptance Testing (UAT) and data validation for new datasets and pipelines, troubleshooting discrepancies to ensure data accuracy and reliability.
- Championed data stewardship and metadata documentation best practices across retail domains, contributing to a more governed and understandable data environment.
- Contributed to the development of a modern data environment by recommending improvements to requirements processes and advocating for reusable data assets.

## SKILLS

**Business Analysis** – Requirements Gathering, Stakeholder Management, Data Use Cases, Technical Specifications, Agile Methodologies, UAT, Business Process Improvement

**Data Quality & Governance** – Data Stewardship, Metadata Management, Data Governance, KPI Definition, Business Metrics, Validation Criteria, Operational Checks

**Data Engineering Support** – Source-to-Target Mapping, Data Transformation Logic, Data Pipeline Requirements, Integration Requirements, Data Modelling Support

**BI & Reporting** – Power BI, Tableau, Dashboard Validation, Data Products, Self-Service Analytics, Data Accessibility

**Core Technologies** – SQL, Python, Java, AWS, PostgreSQL, Jira, Confluence

## PROJECTS

### Retail Operations Analytics Dashboard Enhancement

- Collaborated with retail operations stakeholders to define requirements for a new **sales performance dashboard**, focusing on key metrics for daily revenue and customer traffic.
- Translated business requirements into detailed data transformation logic and source-to-target mappings for the data engineering team, ensuring accurate data ingestion from POS systems and inventory databases.
- Supported UAT and validation of the final dashboard in **Power BI**, verifying data accuracy against source systems and gathering feedback for iterative improvements.

### Customer Transaction Data Quality Initiative

- Defined business metric definitions and data quality rules for customer transaction data, working with Finance and Commercial teams to establish clear, consistent definitions.
- Developed **Python scripts** to automate data validation checks against defined quality rules, identifying and flagging discrepancies in transaction logs for further investigation.
- Documented metadata and business context for key transaction attributes, improving data understanding and enabling more reliable analysis for the wider organization.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
